

Ojas Srivastava --- Cursor Personal Stats Snapshot

Generated from local Cursor data on this machine (15 Aug 2026).

Account: srivastavaojas.socialmedia@gmail.com | Plan: Cursor Pro

Token / \$ spend is NOT in this file --- open cursor.com/dashboard/usage while logged in.

What could NOT be fetched automatically

- Included / on-demand token spend and per-request \$ (needs Cursor web session).
- Official analytics leaderboard (Teams/Enterprise analytics API; you are on personal Pro).

To get tokens: open <https://cursor.com/dashboard/usage> and <https://cursor.com/dashboard/spending>.

Account & setup

- Plan: Pro (Google signup)
- MCP servers configured: 6 --- GitHub, Supabase, Vercel, Firebase, Redis, Stitch (+ built-in browser MCP in agent)
- Cursor Agent skills installed: 20 (automate, canvas, sdk, review-security, split-to-prs, ...)
- Editor extensions installed: ~27 (Python, Jupyter, C/C++, CMake, Live Server, ChatGPT, PDF, CP helper, ...)
- Composer / Agent sessions tracked in local headers: 234
- Saved Cursor plans on disk: 5

AI code tracking (local DB since ~10 Jan 2026)

- AI code-hash events: 56,459
- Distinct Agent/Composer requests: 256
- Distinct conversations with code hashes: 30
- Distinct files touched: 358
- By source: composer 55,932 | tagged human 527
- Top models in hashes: default 47,216 | grok-4.5 6,707 | grok-4.6 1,372 | composer-2.5 637
- Top file types: .py 33,646 | .tex 7,930 | .md 4,044 | .sh 2,553 | .tsx 1,824 | .cpp 1,293

Scored commits (Cursor AI attribution)

- Commits scored: 437 (284 with line breakdowns)
- Lines added (tracked): ~317,577 | deleted: ~47,665
- Attributed composer lines added: ~172,314 | human lines added (tracker): ~333
- Note: AI%% on scored commits is high and biased toward Agent-heavy workflows --- do NOT put raw AI%% on a job resume.

Git activity (Desktop scan, author match 'ojas')

- ~1,077 commits matching author 'ojas' across ~16 local repos scanned
- Top: LogiFlow (~436), Ojas-Srivastava05 (~150), TLE Eliminators (~123), Resume Optimiser (~97), Portfolio (~79)

Resume-safe framing (recommended)

Recruiters care about shipped outcomes, not token counts. Prefer: Cursor Pro daily user; Agent/Composer for multi-file shipping; MCP to GitHub/Supabase/Vercel/Firebase/Redis; skills/rules workflows; human review on every merge. Avoid: token totals, AI%% of commits, extension vanity counts.
