Hiring Team

GE HealthCare

Digital Technology / IT — Next-Gen Visualization / Compute Platform

Bengaluru, India

Re: Application for Software Intern (R4043319)

Dear Hiring Team,

I am writing to apply for the Software Intern position (R4043319) with GE HealthCare's Next-Gen Visualization / Compute Platform team in Bengaluru. I am a penultimate-year B.Tech Artificial Intelligence student at SVNIT Surat (CGPA 9.20/10, graduating May 2028; no active backlogs) with hands-on experience delivering production software across the full SDLC. I am motivated to contribute to next-generation compute and visualization platform software that advances digital healthcare technology, and I am available for an on-site internship in Bengaluru.

At IFFCO, I partnered with cross-functional stakeholders to gather requirements, design software modules, and deliver production web services using Node.js, Express.js, and MySQL that automated 50+ daily operational workflows. I designed 10+ RESTful APIs with optimized SQL schemas, contributed to unit and integration testing, debugged production issues, participated in peer code reviews, and supported CI/CD with Docker—experience across requirements analysis, design, coding, testing, and deployment in a globally distributed engineering culture.

On LogiFlow (Google Solution Challenge 2026 Global Top 106), I co-led backend and compute-platform work on GCP Cloud Run, achieving 100–400 ms hot-path latency across 580+ corridors and 9,526 stations using Redis caching and modular services. I built a pytest regression suite with 100/100 business-rule test cases and documented API contracts for maintainability and QA validation—practices I would bring to healthcare software where correctness and traceability matter. I also solo-built Community Hero (Google for Developers Vibe2Ship 2026 Global Top 20), shipping a map-based visualization PWA on Cloud Run with geo-tagged reporting and admin analytics under tight timelines.

I bring strong foundations in data structures and algorithms (LeetCode Knight, 2048 rating, 711+ solved; Codeforces Specialist, 1419, 252+ solved) and a track record of debugging, root-cause analysis, and clear documentation. I would welcome mentorship and feedback while contributing to GE HealthCare's mission of improving lives through meaningful innovation. Thank you for your time and consideration.

Sincerely,

Ojas Srivastava
