Intern — Digital Technology / IT (R4043319) | B.Tech Artificial Intelligence, SVNIT (CGPA 9.20/10) | Willing to work on-site at GE HealthCare, Bengaluru

Summary

Penultimate-year **B.Tech Artificial Intelligence** student at **SVNIT Surat (CGPA 9.20/10)**, graduating May 2028; **no active backlogs**). **Software development** engineer with hands-on experience delivering production software across the full **SDLC**—requirements analysis, design, coding, **unit/integration testing**, debugging, and deployment. Strong **data structures and algorithms** (LeetCode Knight **2048**, **711+** solved). Experienced collaborating with **globally distributed and cross-functional teams**, seeking **mentorship and feedback**, and motivated to contribute to **next-generation compute and visualization platform** software that advances **digital healthcare technology** at GE HealthCare Bengaluru.

Education

Bachelor of Technology in Artificial Intelligence CGPA: 9.20/10
Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat, India Aug 2024 – May 2028

- Relevant Coursework:** Data Structures and Algorithms, Software Engineering, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks, Distributed Systems, Machine Learning
- Eligibility:** B.Tech Artificial Intelligence; aggregate CGPA well above 7.0/10 threshold; no active backlogs; available for on-site internship in Bengaluru

Experience

Software Engineering Intern Jun 2025 – Jul 2025
IFFCO (Indian Farmers Fertiliser Cooperative), Phulpur Unit, Prayagraj, India

- Analyzed **problem statements** with **cross-functional stakeholders**; designed and delivered production software (**Node.js**, **Express.js**, **MySQL**) within defined timelines under mentor guidance.
- Built **10+ RESTful APIs** with optimized SQL; improved reliability and performance through structured error handling, indexing, and **debugging**.
- Contributed to **unit and integration testing**, **peer code review**, **Docker**, and **CI/CD**—demonstrating **teamwork**, ownership, and **integrity** in a cooperative engineering environment.

Projects

LogiFlow — Multi-Modal Logistics Platform (Google Solution Challenge 2026, Global Top 106) Apr 2026 – Jun 2026
Python, FastAPI, C++, TypeScript, Next.js, Redis, GCP Cloud Run, Scikit-learn, pytest GitHub | Live

- Co-led backend and UI delivery on **GCP Cloud Run**; engineered **100–400 ms** read paths across 580+ corridors using Redis caching and modular **compute platform** services.
- Built **pytest** regression suite (**100/100** business-rule validations) and ML delay model (15,650 train-days); documented REST APIs for maintainability and **QA** validation.

Community Hero — Civic Reporting PWA (Google for Developers Vibe2Ship 2026, Global Top 20) Jun 2026
React, TypeScript, Express, Firebase, Gemini, GCP Cloud Run, Google Maps GitHub | Live

- Solo-built mobile-first PWA with **map-based visualization**, geo-tagged reports, admin analytics dashboard, and Postman-tested REST APIs deployed on **Cloud Run**.
- Shipped Gemini categorization, SLA routing, and community verification—delivering all hackathon features to production under tight timelines with **minimal supervision**.

AirHelp — AI Airport Companion (PowerMind Hackathon 2026) 2026
Python, FastAPI, React, WebSockets, ChromaDB, RAG, NetworkX GitHub

- Shipped AI companion with intent orchestration, RAG semantic search, and **real-time** WebSocket alerts; tuned **1–3s** response latency for 50–100 concurrent users through performance debugging.
- Built graph-based A* navigation module with **95%+** navigation accuracy—applying strong **problem-solving** and algorithmic thinking to user-facing software.

Technical Skills

Software Development: Python, C++, C, Java, JavaScript, TypeScript, SQL; **object-oriented programming**; **REST APIs**; Git, GitHub, Docker, CI/CD, Linux
CS Foundations: Data structures, algorithms, software design, operating systems, DBMS, computer networks, distributed systems
Platforms & Tools: GCP Cloud Run, Firebase, MySQL, PostgreSQL, MongoDB, Redis, React, Next.js, FastAPI, Node.js, Express.js, pytest
AI (supporting): Scikit-learn, NumPy, Pandas, RAG pipelines, Gemini API integration
Professional: Agile SDLC, requirements analysis, unit/integration testing, debugging, documentation, code review, **team** collaboration, seeking feedback

Achievements and Leadership

- LeetCode Knight:** Rating **2048**, **711+** solved, 32 contests (leetcode.com/Oju_Srivastava)
- Codeforces Specialist:** Rating **1419**, **252+** solved (codeforces.com/profile/Oju)
- Google Solution Challenge 2026 — Global Top 106** (LogiFlow); **Google for Developers Vibe2Ship 2026 — Global Top 20** (Community Hero); **PowerMind Hackathon 2026** (AirHelp)
- McKinsey.org Forward Fellow (2026)**; Executive Member, ACM SVNIT & DSA Mentor, Nexus SVNIT (2024–Present)
