Software Engineer, Intern — Stripe University | B.Tech Artificial Intelligence, SVNIT (CGPA 9.20/10) | Available for on-site internship in Bengaluru, India

Summary

Penultimate-year **Bachelor's** student in **Artificial Intelligence** (related **computer science** discipline) at **SVNIT Surat (CGPA 9.20/10)**, graduating May 2028). Software engineer with a strong **fundamental understanding of computer science, programming** experience across **Java, JavaScript, TypeScript, Python, and C++**, and a track record of shipping **production software** with **meaningful impact**. Experienced in **systems design and testing, code reviews, design discussions, and cross-functional** collaboration—seeking and incorporating **feedback** from mentors, peers, and stakeholders. Comfortable learning **unfamiliar systems** quickly through independent research and mentorship. LeetCode Knight (**2048, 711+** solved) | Codeforces Specialist (**1419**).

Education

Bachelor of Technology in Artificial Intelligence

Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat, India

CGPA: 9.20/10

Aug 2024 – May 2028

- **Relevant Coursework:** Data Structures and Algorithms, Software Engineering, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks, Distributed Systems
- **Eligibility:** 2+ years of university education completed; related CS/math discipline; no active backlogs; available for **100%** in-office internship in Bengaluru

Experience

Software Engineering Intern

IFFCO (Indian Farmers Fertiliser Cooperative), Phulpur Unit, Prayagraj, India

Jun 2025 – Jul

2025

- Shipped **production software** used daily by operations teams (**Node.js, Express.js, MySQL**)—automating **50+ workflows** after gathering requirements from **cross-functional stakeholders**.
- Built **10+ RESTful APIs** with optimized SQL; improved reliability through structured error handling, indexing, and **debugging**.
- Participated in **peer code review, unit and integration testing, Docker, and CI/CD**—incorporating mentor and teammate **feedback** to deliver with **minimal defects**.

Projects

LogiFlow — Multi-Service Logistics Platform (Google Solution Challenge 2026, Global Top 106)

Apr 2026 – Jun

2026

Python, FastAPI, JavaScript, TypeScript, Next.js, Redis, GCP Cloud Run, pytest, Git

GitHub | Live

- Co-led backend **systems design** on **GCP Cloud Run**; engineered **statistics aggregation** and caching layers delivering **100–400 ms** read paths across 580+ corridors and 9,526 stations.
- Authored **high-quality pull requests** with **pytest** regression coverage (**100/100** business-rule validations) and documented REST APIs—enabling teammates to navigate a multi-language codebase (**Python, TypeScript, SQL**).

OA Forge — Open-Source Online Assessment Judge (Career Automation Stack)

Jun 2026 –

Present

GitHub

C++17, JavaScript, TypeScript, Next.js, PostgreSQL, Supabase, GitHub Actions

- Built hybrid **C++** code judge with **g++** compilation, subprocess sandboxing, and automated verdict pipelines over **14K+** question occurrences and **5.5K+ test cases**.
- Designed **object-oriented** test harness generation and service-style modules; shipped via **open source** contributions, **code review**, and CI—demonstrating ability to learn and extend an **unfamiliar codebase**.

Community Hero — User-Facing Civic Reporting PWA (Vibe2Ship 2026, Global Top 20)

Jun 2026

JavaScript, TypeScript, React, Express, Firebase, Gemini, GCP Cloud Run

GitHub | Live

- Solo-built and **shipped** mobile-first PWA to production on **Cloud Run**; improved **user-facing** error handling, map-based reporting UX, and admin analytics under tight hackathon timelines.
- Explained technical trade-offs clearly in README and API docs; incorporated judge and peer **feedback** across frontend (**JavaScript/React**) and backend (**Express**) services handling **HTTP requests**.

Technical Skills

Programming Languages: Java, JavaScript, TypeScript, Python, C++, C, SQL; comfortable learning **Ruby, Scala, and Go** with strong CS fundamentals

Computer Science: Data structures, algorithms, software design, operating systems, DBMS, computer networks, distributed systems, **systems design**

Engineering Practices: **Production software, code review, design discussions, pull requests, test coverage** (pytest), unit/integration testing, debugging, Git, GitHub, Docker, CI/CD, Agile

Platforms: GCP Cloud Run, Firebase, MySQL, PostgreSQL, Redis, REST APIs, WebSockets, React, Next.js, Node.js, FastAPI, Linux

Communication: Clear technical writing, API documentation, status updates to **cross-functional** teammates and stakeholders

Achievements and Leadership

- **LeetCode Knight:** Rating **2048, 711+** solved, 32 contests (leetcode.com/Oju_Srivastava)
- **Codeforces Specialist:** Rating **1419, 252+** solved (codeforces.com/profile/Oju)
- **Google Solution Challenge 2026 — Global Top 106** (LogiFlow); **Google for Developers Vibe2Ship 2026 — Global Top 20** (Community Hero); **McKinsey.org Forward Fellow (2026)**
- **Executive Member, ACM SVNIT & DSA Mentor, Nexus SVNIT (2024–Present)** — workshops, contests, and mentoring in cooperative engineering settings
