Bengaluru, Karnataka, India 560066

Re: Application for Software Intern — Job Id R4041235

Dear Hiring Team,

I am writing to apply for the Software Intern position (Job Id R4041235) at GE HealthCare in Bengaluru. I am a penultimate-year B.Tech Artificial Intelligence student at SVNIT Surat (CGPA 9.20/10, graduating May 2028) with demonstrated proficiency in object-oriented languages (C++, Python, Java; familiar with C#) and experience delivering software through design, development, testing, and deployment. I am eager to contribute to healthcare software products in a fast-paced engineering environment and am available for an on-site Co-op/Intern role in Bengaluru (relocation assistance not required).

At IFFCO, I designed, developed, tested, and deployed production applications using Node.js, Express.js, and MySQL that automated 50+ daily workflows. I wrote and maintained production APIs, performed unit and integration testing, participated in code reviews to improve quality and efficiency, and collaborated with senior engineers and stakeholders on requirements and technical solutions—experience closely aligned with the responsibilities listed for this internship.

On LogiFlow (Google Solution Challenge 2026 Global Top 106), I co-led backend and platform work on GCP Cloud Run, researching caching and streaming approaches that achieved 100–400 ms hot-path latency. I documented software designs and shipped a pytest suite with 100/100 business-rule validations to protect reliability. Separately, I solo-built Community Hero (Google for Developers Vibe2Ship 2026 Global Top 20), owning a civic reporting PWA from requirements through Cloud Run deployment, and shipped AirHelp with real-time WebSocket services under concurrent load.

I bring strong data-structures and algorithms foundations (LeetCode Knight, rating 2048, 711+ solved; Codeforces Specialist, 1419, 252+ solved), fluency with Git, and clear communication skills from campus mentoring (ACM SVNIT, Nexus DSA). I would welcome the opportunity to learn from GE HealthCare's engineering team while contributing meaningful software to healthcare applications. Thank you for your time and consideration.

Sincerely,
Ojas Srivastava
