Application Engineering Intern — Winter 2027 | Bengaluru, India | Full-time 26 weeks (Jan 2027+)

B.Tech Artificial Intelligence (Computer Science / Information Technology-related), SVNIT Surat | CGPA 9.20/10

English fluent | Available to reside in India for the full internship duration

Professional Summary

Penultimate-year **B.Tech** student in a **Computer Science**/Information Technology-related program (Artificial Intelligence) at **SVNIT Surat**, graduating **May 2028**. Builds and supports **internal business applications** and tools that **automate** operational workflows — custom **web front-ends**, **back-end services**, and **RESTful APIs** integrated with **SQL** databases. Hands-on with **Java**, **Python**, **C++**, **JavaScript/TypeScript**, **API development**, and **algorithms**. Partners with stakeholders to translate **business requirements** into technical solutions; owns design, development, testing, deployment, issue identification, and clean modular code. Eager to contribute to Google Application Engineering in Bengaluru for Winter 2027.

Education

Bachelor of Technology in Artificial Intelligence (CS / IT-related technical field)

CGPA: 9.20/10

Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat, India

Aug 2024 – May 2028

- **Relevant Coursework:** Data Structures & Algorithms, Software Engineering, DBMS/**SQL**, Operating Systems, Computer Networks, Object-Oriented Design, Distributed Systems
- **Availability:** Full-time Winter 2027 internship (**≥26 weeks** / ~6 months outside university term), Bengaluru

Professional Experience

Software Engineering Intern — Internal Applications & Workflow Automation

IFFCO (Indian Farmers Fertiliser Cooperative), Phulpur Unit, Prayagraj, India

Jun 2025 – Jul 2025

- Designed, developed, tested, and deployed production **internal business software** (**Node.js**, **Express**, **MySQL/SQL**) automating **50+ daily** partner workflows — configuration, customization, and reliable day-to-day operations support.
- Built **10+ RESTful APIs** / **web services** with optimized SQL (indexing, joins); translated operational needs into technical solutions and resolved production issues with structured debugging.
- Practiced high development standards: technical design, unit/integration **testing**, issue identification & resolution, **Docker**, **CI/CD**, and clean, modular, maintainable code reviewed with mentors.

Projects (Application Engineering — Front-end + Back-end + Integrations)

LogiFlow — Multi-Modal Logistics Decision Platform (Google Solution Challenge 2026, Global Top 106)

2026

Python, FastAPI, TypeScript, React/Next.js, SQL, Redis, REST APIs, GCP Cloud Run, pytest

GitHub | Live

- Co-led custom **web front-end + back-end services** that integrate multi-pipeline systems into one decision tool; deployed on **GCP Cloud Run** with hot-path reads at **100–400 ms**.
- Documented APIs and shipped **automated testing** (**100/100** business-rule checks) — scalable tooling for operational planning workflows.

Community Hero — Civic Reporting Web App (Google for Developers Vibe2Ship 2026, Global Top 20)

Jun 2026

JavaScript, TypeScript, React, Express, REST APIs, Firebase, HTML/CSS

GitHub | Live

- Solo-built and supported a production-style **web** application (front-end + API services); integrated third-party Maps/Firebase capabilities and resolved partner/demo issues under tight timelines.

RangRiti — Full-Stack Marketplace (Team Technical Lead)

2025

JavaScript, Node.js, Express, MongoDB, REST APIs

GitHub | Live

- Led a 4-member team shipping booking/commerce flows and backend architecture — translating product requirements into deployed internal-facing and user-facing modules.

Technical Skills

Programming languages: **Java**, **Python**, **C++**; **JavaScript**, **TypeScript**, **SQL**, **C**

Application / web stack: **JavaScript/TypeScript**, **React**, **Next.js**, **Node.js**, **Express**, **FastAPI**, **HTML/CSS** — custom front-ends and back-end services

APIs & data: **RESTful API development** / web services, **SQL** & relational databases (**MySQL**, **PostgreSQL**), **MongoDB**, **Redis**

Systems & algorithms: Data structures, **algorithms**, systems software fundamentals, **OOP**, distributed services on **GCP Cloud Run**

Engineering practices: Technical design, solution development, systems configuration, test documentation/execution, issue identification & resolution, **pytest**, **Docker**, **CI/CD**, **Git**, clean modular code

Collaboration: Fluent **English** for technical discussions; partner closely with analysts/stakeholders; Scrum-style delivery

Achievements and Leadership

- **LeetCode Knight:** Rating **2048**, **711+** solved — strong algorithms practice
- **Google Solution Challenge 2026** — **Global Top 106** (LogiFlow); **Vibe2Ship 2026** — **Global Top 20** (Community Hero)
- **Codeforces Specialist** (1419); **ACM SVNIT** Executive Member & **Nexus DSA** Mentor — clear technical communication in English
