

Ojas Srivastava

+91-7424978046 | srivastavaojas454@gmail.com | LinkedIn | GitHub | Portfolio
Pre-final year | B.Tech Artificial Intelligence, SVNIT Surat | CGPA **9.20/10** | Graduating **May 2028**
AI Engineering Intern — NeoSapien | Open to **Bangalore (Onsite)** | Available **2+ months**

Education

SVNIT Surat	B.Tech — Artificial Intelligence	9.20/10	2024–2028
Shiv Jyoti Convent School, Kota	Class XII (CBSE)	95.80%	2024
St. Joseph's College, Prayagraj	Class X (ICSE)	97.20%	2022
Coursework: Machine Learning, Deep Learning, NLP foundations, Probability & Statistics, Linear Algebra, DSA, DBMS, Software Engineering.			

Experience

Software Engineering Intern	Jun–Jul 2025
IFFCO (Indian Farmers Fertiliser Cooperative), Phulpur Unit, Prayagraj	
- Shipped production APIs and tools (Node.js, Express, MySQL) automating 50+ daily workflows—ownership from design through deploy. - Built 10+ REST APIs with validation and structured errors; practiced Git, Docker, CI/CD, and clear handoff docs with mentors.	

AI Engineering Projects

AirHelp — Memory Retrieval & Contextual Q&A (PowerMind Hackathon 2026)	2026
Python, FastAPI, RAG, ChromaDB, Sentence Transformers, embeddings, WebSockets	GitHub
- Built an intelligent memory/retrieval stack: embeddings + ChromaDB over structured and unstructured knowledge for grounded, contextual answers. - Designed conversation-style Q&A with layered memory; load-tested 50–100 concurrent users (1–3s latency) and hardened failure modes. - Added graph-based A* indoor navigation on custom walking graphs—practice combining retrieval with structured knowledge for user guidance.	
Community Hero — LLM Pipelines & Personalization Signals (Vibe2Ship 2026, Global Top 20)	Jun 2026
TypeScript, Python-adjacent tooling, Gemini API, Express, Firestore, prompt engineering	GitHub / Live
- Solo-shipped an LLM categorization workflow (Gemini) with prompt engineering and guardrails for noisy real-world text. - Built end-to-end AI feature path: ingest → model decision → routing/admin review; evaluated model vs rule-based fallbacks before production deploy.	
LogiFlow — ML + Contextual Explainability (Google Solution Challenge 2026, Global Top 106)	Apr–Jun 2026
Python, FastAPI, Scikit-learn, Gemini, Redis, SQL, GCP Cloud Run	GitHub / Live
- Trained Gradient Boosting models on 15,650+ records; built multi-objective ranking and GenAI explainability for human-readable decisions. - Deployed FastAPI services with Redis caching (100–400 ms hot paths); wrote pytest suite (100/100 checks) for reliable AI+backend release.	

Skills

AI / NLP: LLMs, RAG, embeddings, vector databases (ChromaDB), prompt engineering, contextual retrieval, conversation memory, model evaluation
Languages: Python, TypeScript, JavaScript, C++, SQL
Backend for AI: FastAPI, REST APIs, Node.js/Express, Redis, Firestore/MySQL, Docker, Git, CI/CD
Practices: Agentic-style multi-step AI workflows (retrieve → reason → act), PoCs to production, documentation & demos

Achievements & Leadership

- Chairperson, Nexus SVNIT** — departmental technical cell; mentoring for **500+** students
- Google Solution Challenge 2026** — **Global Top 106**; **Vibe2Ship 2026** — **Global Top 20**
- LeetCode Knight:** peak **2048**; **Codeforces Specialist:** **1419**
