B.Tech Artificial Intelligence, SVNIT Surat | CGPA: **9.20/10** | Expected Graduation: **2028** | Roll: U24AI028

Education

•Bachelor of Technology in Artificial Intelligence

CGPA: 9.20/10

Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat, India

2024 – 2028

- **Relevant coursework:** Machine Learning, Deep Learning, Probability & Statistics, Linear Algebra, Data Structures & Algorithms, Optimization, Database Management Systems, Computer Networks

Machine Learning & AI Projects

•LogiFlow — Multi-Modal Logistics Optimizer (Google Solution Challenge 2026)

2026 – Present

Python, FastAPI, Scikit-learn, NumPy, Pandas, Redis, Feature Engineering

GitHub

- Built a **Gradient Boosting** delay-prediction model on traffic, weather, and historical shipment features; trained/evaluated with train-test splits and error analysis for route risk scoring.
- Designed a **multi-objective ranking** pipeline using Pareto dominance over time, cost, and predicted delay; parallelized data fetching with Redis caching for production-scale inference.
- Deployed end-to-end ML + API stack (FastAPI backend, Next.js frontend) with explainability via Gemini for human-readable routing decisions.

•AirHelp — AI Airport Companion (PowerMind Hackathon 2026)

2026

Python, FastAPI, RAG, ChromaDB, Sentence Transformers, A* Pathfinding

GitHub

- Implemented **semantic search** with embedding-based retrieval (Sentence Transformers + ChromaDB) and graph-based **A*** navigation for real-time airport guidance.
- Built modular AI stack: RAG QA, OCR boarding-pass parsing, WebSocket alerts, and offline speech (Whisper STT) with layered conversation memory.

•RangRiti — Cultural Marketplace (Technical Lead)

Jun – Aug 2025

Node.js, Express.js, MongoDB, REST APIs, AI Storytelling

GitHub

- Led a 4-member team to ship a full-stack marketplace (40+ pages/services) with AI-assisted content features for Web Wonders 2025.

Experience

•Software Engineering Intern

IFFCO (Indian Farmers Fertiliser Cooperative) — Phulpur Unit, Prayagraj

Jun – Jul 2025

- Developed production **Node.js/Express/MySQL** services with JWT auth, validation, and REST APIs automating **50+ daily** enterprise workflows.
- Contributed to **Docker** containerization, CI/CD, and deployment with senior engineers; practiced code review and structured debugging in a live environment.

Technical Skills

Machine Learning: Scikit-learn (Gradient Boosting, classification/regression), NumPy, Pandas, feature engineering, train/validation evaluation, model deployment

AI / NLP: RAG pipelines, embeddings (Sentence Transformers), vector databases (ChromaDB), LLM integration (Gemini)

Programming: Python, C/C++ (STL), JavaScript, TypeScript — strong DSA and implementation skills

Math & CS Foundations: Probability, Statistics, Linear Algebra, Optimization, DBMS, OS, Computer Networks, Distributed Systems

Tools: FastAPI, Git, Docker, Linux, Redis, MongoDB, MySQL, React/Next.js, Vercel/Render

Achievements & Leadership

•LeetCode Knight (Max Rating 2039, 600+ problems solved)

Competitive programming — algorithms, data structures, implementation under time constraints

•Codeforces (Max Rating 1360)

Regular contest participation and problem-solving practice

•Executive Member — ACM SVNIT Surat

2024 – Present

Organizes campus coding contests, workshops, and technical events

•Mentor — Nexus SVNIT

2024 – Present

Mentors juniors in DSA, competitive programming, and software projects

- Google Solution Challenge 2026 (LogiFlow) | PowerMind Hackathon 2026 (AirHelp) | Top-performing cohort, B.Tech AI, SVNIT Surat
