Hiring Team
CoinDCX
Intern — Engineering
Bangalore, India

Re: Application for Intern - Engineering (ID: 1764)

Dear Hiring Team,

I am applying for the Intern – Engineering role (ID: 1764) at CoinDCX in Bangalore. I am a penultimate-year B.Tech Artificial Intelligence student at SVNIT Surat (CGPA 9.20/10, graduating May 2028) and I am ready to work from the Bangalore office. CoinDCX's mission—making crypto accessible to every Indian on safe, scalable platforms—excites me as an engineer who wants to ship real product impact in a high-ownership environment.

I bring the fundamentals you listed. I am strong in data structures and algorithms (LeetCode Knight, peak 2048; Codeforces Specialist, 1419) and comfortable in Python, Java, and JavaScript/TypeScript (Node.js). At IFFCO, I contributed across the SDLC: coding, testing, and debugging production APIs (MySQL) that automated 50+ daily workflows, with code review, Docker, and CI/CD. On LogiFlow (Google Solution Challenge 2026 Global Top 106), I co-built scalable FastAPI services with Redis and SQL; on Community Hero and AirHelp I shipped features, handled concurrency, and learned to keep code clean and documented under pressure.

I collaborate well across roles, ask questions early, and take ownership of outcomes. I would welcome the chance to help CoinDCX build reliable systems under senior engineers' guidance. Thank you for your time and consideration.

Sincerely,
Ojas Srivastava
