Hiring Team
Copeland
Project Intern
Pune, India

Re: Application for Project Intern (JR117257)

Dear Hiring Team,

I am applying for the Project Intern role (JR117257) at Copeland in Pune. I am a penultimate-year B.Tech Artificial Intelligence student at SVNIT Surat (CGPA 9.20/10, graduating May 2028) and I am available for a full-time on-site internship. I am excited by Copeland's mission in sustainable HVACR technologies and want to support electronics hardware and software project work under a project guide—learning deeply, documenting carefully, and delivering reliably.

At IFFCO, I worked day-to-day under mentorship on production software: gathering requirements, implementing REST APIs, testing, and presenting progress to stakeholders. I maintained documentation and treated operational data as confidential—habits that map directly to Copeland's expectations around interim reports, final documentation, and protecting sensitive project information.

Across LogiFlow (Google Solution Challenge 2026 Global Top 106) and Community Hero (Vibe2Ship 2026 Global Top 20), I practiced structured learning, milestone reporting, and clear demos. I bring strong programming fundamentals (Python, C/C++, JavaScript/TypeScript), systems coursework (COA, OS, networks), and a track record of finishing projects with written artifacts teammates can reuse.

I learn quickly, ask good questions, and take ownership of assigned tasks. I would welcome the chance to contribute to Copeland's electronics hardware and software projects in Pune. Thank you for your time and consideration.

Sincerely,
Ojas Srivastava
