Pre-final year | B.Tech Artificial Intelligence, SVNIT Surat | CGPA **9.20/10** | Graduating **May 2028**
Intern — Engineering (CoinDCX) | ID **1764** | Open to **Bangalore (Office)**

Education

SVNIT Surat	B.Tech — Artificial Intelligence	9.20/10	2024–2028
Shiv Jyoti Convent School, Kota	Class XII (CBSE)	95.80%	2024
St. Joseph's College, Prayagraj	Class X (ICSE)	97.20%	2022
<i>Coursework:</i> Data Structures & Algorithms, Design & Analysis of Algorithms, DBMS/SQL, Object-Oriented Programming, Operating Systems, Computer Networks, Software Engineering, Computer Organization & Architecture.			

Experience

Software Engineering Intern	<i>Jun–Jul 2025</i>
<i>IFFCO (Indian Farmers Fertiliser Cooperative), Phulpur Unit, Prayagraj</i>	
- Built production tools with Node.js, Express, and MySQL that automated 50+ daily operational workflows for plant stakeholders. - Developed 10+ REST APIs with input validation, SQL queries, and structured error handling; debugged broken flows using logs and stack traces. - Participated across the SDLC—coding, testing, debugging, and peer code review; used Git, Docker, and CI/CD before deployment. - Wrote short technical docs and updated mentors/managers on progress and trade-offs in a fast-paced delivery environment.	

Projects

LogiFlow — Scalable Multi-Service Platform (Google Solution Challenge 2026, Global Top 106)	<i>Apr–Jun 2026</i>
<i>Python, FastAPI, TypeScript, Next.js, Redis, SQL, GCP Cloud Run, pytest</i>	<i>GitHub Live</i>
- Technical Co-Lead: designed REST APIs in FastAPI and a Next.js frontend so route/decision results were queryable in a live web app. - Built SQL/Python pipelines over 15,000+ train-day records—cleaning, joining, and validating inputs before they reached services. - Added Redis caching for hot corridor/route reads; deployed backends on GCP Cloud Run; measured hot-path latency around 100–400 ms. - Wrote a pytest regression suite with 100/100 business-rule checks so broken logic fails in CI before release; documented API endpoints.	
Community Hero — Full-Stack Product (Vibe2Ship 2026, Global Top 20)	<i>Jun 2026</i>
<i>TypeScript, React, Express, Firebase/Firestore, Gemini API, GCP Cloud Run</i>	<i>GitHub Live</i>
- Solo-owned end-to-end delivery: React/Express app, Firestore data model, Cloud Run deploy, and live demo for a global Top-20 finish. - Implemented geo-tagged reporting and an admin review panel; wrote API handlers with validation for empty/noisy submissions. - Integrated Gemini API for report categorization with guard checks so bad model output does not break routing.	
AirHelp — Concurrent Backend Services (PowerMind Hackathon 2026)	<i>2026</i>
<i>Python, FastAPI, React, WebSockets, RAG</i>	<i>GitHub</i>
- Built a FastAPI backend and React UI for airport-style Q&A using a retrieval pipeline over structured + unstructured knowledge. - Added WebSocket channels for live-style alerts; load-tested about 50–100 concurrent users (1–3s latency) and fixed bottlenecks.	

Skills

Languages: Python, Java, JavaScript (Node.js), TypeScript, C++, C, SQL
Core CS: Data structures, algorithms, OOP, DBMS/SQL, OS, computer networks, basic system design
Backend & Data: REST APIs, FastAPI, Node.js/Express, MySQL, PostgreSQL, MongoDB/Firestore, Redis, WebSockets
Engineering: Git, Docker, CI/CD, Linux basics, pytest, code review, debugging, technical documentation

Achievements & Leadership

- LeetCode Knight:** peak **2048**, **744** solved, **32** contests; **Codeforces Specialist:** **1419**, **265** solved
- Google Solution Challenge 2026 — Global Top 106; Vibe2Ship 2026 — Global Top 20**
- Chairperson, Nexus SVNIT** — departmental technical cell; workshops/mentoring for **500+** students
- Executive Member, ACM SVNIT; McKinsey.org Forward Fellow (2026)**
