Pre-final year | B.Tech Artificial Intelligence, SVNIT Surat | CGPA **9.20/10** | Graduating **May 2028**

AI / GenAI Intern — SLB | Requisition ID **19084**

Education

SVNIT Surat	B.Tech — Artificial Intelligence	9.20/10	2024–2028
Shiv Jyoti Convent School, Kota	Class XII (CBSE)	95.80%	2024
St. Joseph's College, Prayagraj	Class X (ICSE)	97.20%	2022
<i>Coursework:</i> Machine Learning, Deep Learning, Probability & Statistics, Linear Algebra, Data Structures & Algorithms, DBMS/SQL, Software Engineering, Operating Systems.			

Experience

Software Engineering Intern

Jun–Jul 2025

IFFCO (Indian Farmers Fertiliser Cooperative), Phulpur Unit, Prayagraj

- Built production **REST APIs** and tools (**Node.js**, **Express**, **MySQL**) that automated **50+** **daily** workflows; practiced design docs, debugging, and stakeholder demos.
- Delivered with **Git**, **Docker**, and **CI/CD**; collaborated with engineers on feasibility, reliability, and handoff documentation.

AI / GenAI Projects

AirHelp — RAG Airport Companion (PowerMind Hackathon 2026)

2026

Python, FastAPI, RAG, ChromaDB, Sentence Transformers, React, WebSockets

GitHub

- Built a **RAG Q&A** prototype: embeddings + **ChromaDB** retrieval over structured/unstructured airport knowledge; FastAPI services and React UI.
- Experimented with retrieval quality, conversation memory, and latency; load-tested at **50–100** concurrent users (**1–3s** response) and fixed bottlenecks.
- Documented architecture and trade-offs for teammates; presented demo flows for live alerts via **WebSockets**.

Community Hero — GenAI Civic Reporting (Vibe2Ship 2026, Global Top 20)

Jun 2026

TypeScript, React, Express, Gemini API, Firebase/Firestore, GCP Cloud Run

GitHub | Live

- Solo-owned PoC-to-production: **prompt engineering** and **LLM** (Gemini) categorization of citizen reports with guard checks for noisy/empty inputs.
- Evaluated model behavior vs rule-based fallbacks; shipped on Cloud Run with Firestore and documented implementation approach for judges/reviewers.

LogiFlow — ML + LLM Explainability (Google Solution Challenge 2026, Global Top 106)

Apr–Jun 2026

Python, FastAPI, Scikit-learn, Gemini, TypeScript, Next.js, Redis, SQL

GitHub | Live

- Researched and trained Gradient Boosting delay models on **15,000+** train-day records; compared ranking approaches (Pareto over time/cost/delay).
- Prototyped **GenAI** explainability (Gemini) for human-readable routing decisions; deployed REST services on GCP Cloud Run with Redis caching (**100–400 ms** hot paths).
- Authored experiment notes, API docs, and a **pytest** suite (**100/100** business-rule checks) to validate solution feasibility before release.

Skills

Languages: Python, TypeScript, JavaScript, C++, Java, SQL, C

AI / GenAI: LLMs (Gemini), RAG, embeddings, vector DB (ChromaDB), prompt engineering, model evaluation, PoCs & prototypes

ML & Data: Scikit-learn, feature engineering, train/validation evaluation, Pandas, NumPy

Software Engineering: REST APIs, FastAPI, Node.js/Express, React/Next.js, Docker, CI/CD, Git, technical documentation & demos

Achievements & Leadership

- Chairperson, Nexus SVNIT** — departmental technical cell; workshops, contests, and mentoring for **500+** students
- Google Solution Challenge 2026** — **Global Top 106**; **Vibe2Ship 2026** — **Global Top 20**
- LeetCode Knight:** peak **2048**; **Codeforces Specialist:** **1419**
- Machine Learning Specialization** (Andrew Ng / DeepLearning.AI); **McKinsey.org Forward Fellow (2026)**
