Applied Sciences Intern (Job #200041777) | India — Multiple Locations (On-Site)

B.Tech Artificial Intelligence, SVNIT Surat (CGPA 9.20/10) | May 2028 (one academic term remaining after internship)

## Summary

Penultimate-year **bachelor's degree** candidate in **Artificial Intelligence** (Computer Science / Computer Engineering-related field) at **SVNIT Surat**, CGPA **9.20/10**. **Applied Sciences Intern** with hands-on **machine learning**, **data analysis**, and **modeling** on **large-scale datasets**; experienced translating product scenarios into **ML tasks**, running **experimental** iterations, and building **prototypes** of scalable **AI applications**. Strong **algorithms** foundation (LeetCode Knight **2048**, **711+** solved). Passionate about bringing **research to life** in products through **feature ideation**, **data preparation**, and **data quality** controls.

## Education

### Bachelor of Technology in Artificial Intelligence

Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat, India

CGPA: 9.20/10

Aug 2024 – May 2028

- **Eligibility:** Currently pursuing bachelor's in **Computer Science**-related field; **at least one quarter/semester remaining** after internship (graduating May 2028)
- **Relevant Coursework:** Machine Learning, Probability & Statistics, Data Structures & Algorithms, Linear Algebra, DBMS, Software Engineering, Computer Networks

## Experience

### Software Engineering Intern

IFFCO (Indian Farmers Fertiliser Cooperative), Phulpur Unit, Prayagraj, India

Jun 2025 – Jul 2025

- Partnered with stakeholders to clarify product scenarios and requirements; prepared operational **datasets** in **MySQL/SQL** for reporting and workflow automation (**50+ daily** processes).
- Reviewed data quality constraints (validation rules, missing fields, duplicate records) before production use; documented inclusion/exclusion criteria and remediation steps.
- Delivered in a **cooperative team environment** with testing, feedback, and iterative releases—experience applicable to usable dataset development for modeling.

## Projects

### LogiFlow — Predictive ML on Large-Scale Logistics Data (Google Solution Challenge 2026, Global Top 106)

Apr 2026 – Jun 2026

Python, Scikit-learn, Pandas, NumPy, FastAPI, GCP Cloud Run, pytest, feature engineering

GitHub | Live

- Mapped product scenario (route risk) to **ML task**; engineered features from timetable, weather, and delay history on **15,650 train-day large-scale dataset**.
- Trained/evaluated **Gradient Boosting** models with cross-validation (MAE **22.7 min**, **81%** within 30 min); designed **experimental process** for iteration and optimization.
- Built **100/100** data-quality/business-rule validations and deployed **prototype** inference APIs—research concepts applied to real product outcomes.

### AirHelp — Machine Intelligence & RAG Application (PowerMind Hackathon 2026)

2026

Python, FastAPI, ChromaDB, Sentence Transformers, RAG, NumPy, WebSockets

GitHub

- Implemented **machine intelligence** prototype: embeddings, **RAG semantic search**, intent routing, and graph-based navigation; tuned for **50–100 concurrent** users.
- Prepared and cleaned conversational/operational data for retrieval; iterated on chunking, indexing, and evaluation to improve response quality under latency constraints.

### Community Hero — AI Categorization & Dataset Labeling (Google Vibe2Ship 2026, Global Top 20)

Jun 2026

Python, TypeScript, React, Gemini API, Firebase, GCP Cloud Run

GitHub | Live

- Built Gemini-powered categorization pipeline over user-submitted reports; defined quality criteria, handled noisy inputs, and scaled **feature ideation** for routing workflows.

## Technical Skills

**Applied Sciences & ML:** Machine learning, data analysis, modeling, feature engineering, Scikit-learn, Pandas, NumPy, train/validation evaluation, experimental design

**AI & Research Tools:** RAG pipelines, embeddings (Sentence Transformers), vector DBs (ChromaDB), LLM integration (Gemini), prototyping, algorithm development

**Data & Quality:** SQL/MySQL, dataset preparation, data quality review, inclusion/exclusion criteria, large-scale structured datasets, pytest validation

**Foundations:** Algorithms, data structures, probability & statistics, Python, C++, Git, GCP Cloud Run, collaborative research-to-product delivery

## Achievements and Leadership

- **LeetCode Knight:** Rating **2048**, **711+** solved — advanced **algorithms** on structured problems
- **Codeforces Specialist:** Rating **1419**, **252+** solved (profile)
- **Google Solution Challenge 2026 — Global Top 106; Vibe2Ship 2026 — Global Top 20**
- **Executive Member, ACM SVNIT & Mentor, Nexus SVNIT** — communicates technical concepts to peers; growth mindset and collaboration
