Goldman Sachs Recruiting Team
Operations Division
Mumbai, Maharashtra, India (APEJ)

Re: Application for Summer Analyst Program 2027 — Operations Division, Mumbai

Dear Recruiting Team,

I am applying for the Goldman Sachs Summer Analyst Program 2027 in the Operations Division, Mumbai office. I am a penultimate-year B.Tech Artificial Intelligence student at SVNIT Surat (CGPA 9.20/10, graduating May 2028) with strong analytical and problem-solving skills and hands-on experience improving the accuracy and efficiency of high-volume operational processes. I am excited to contribute to Operations at the core of the firm—where disciplined execution, controls, and technology-enabled processes enable banking, sales and trading, and asset management capabilities for clients.

At IFFCO, I supported day-to-day operations by automating 50+ daily workflows using SQL-backed services and REST APIs. I focused on validation controls, structured logging, and exception handling to reduce data errors and protect downstream users—work that mirrors the Operations mindset of ensuring each step in a process is completed accurately and on time. I partnered with cross-functional managers to map information flows, document processes, and resolve production issues under tight deadlines.

On LogiFlow (Google Solution Challenge 2026 Global Top 106), I co-led backend development for a logistics operations platform spanning 580+ corridors and 9,526 stations. I reengineered hot paths to 100–400 ms response times and built 100/100 automated business-rule validations—control-style checks that prevent incorrect outcomes at scale. On Community Hero (Google for Developers Vibe2Ship 2026 Global Top 20), I designed SLA routing and admin review workflows with audit-friendly status tracking, reinforcing my interest in monitored, reliable operational systems.

I bring quantitative rigor (LeetCode Knight, rating 2048, 711+ solved; Codeforces Specialist, 1419), coursework in probability and statistics, and professional exposure through the McKinsey.org Forward Fellow program. I am eager to learn from Goldman Sachs Operations professionals, take on real responsibilities alongside the team, and contribute to the accuracy, efficiency, and risk awareness that keep business flowing. Thank you for your consideration.

Sincerely,
Ojas Srivastava
