Summer Analyst Program 2027 — Operations Division | Class of 2028

B.Tech (Bachelor's Degree), SVNIT Surat (CGPA 9.20/10) | Office Location: Mumbai, Maharashtra, India (APEJ)

Summary

Penultimate-year **bachelor's degree** candidate (**B.Tech Artificial Intelligence**, graduating May 2028) seeking Goldman Sachs **Summer Analyst Program** — a **nine-to-ten-week summer internship** in **Operations Division, Mumbai**. Strong **analytical** and **problem-solving** skills with hands-on experience improving **accuracy and efficiency** of high-volume **operational processes**, **information flows**, and **transaction-style workflows** through **SQL**, **Python**, and process controls. Comfortable working with **cross-functional** teams, documenting **processes**, **monitoring systems**, and identifying issues that could cause operational **risk**, data errors, or penalties. Eager to learn **Operations** at the core of **banking**—supporting **sales and trading** and **asset management** capabilities through disciplined execution, controls, and **technology-enabled process reengineering**.

Education

Bachelor of Technology in Artificial Intelligence CGPA: 9.20/10
Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat, India Aug 2024 – May 2028

- Degree level:** Bachelor's degree (B.Tech); eligible for **Summer Analyst** campus recruiting (Class of 2028)
- Relevant Coursework:** Probability & Statistics, Data Structures & Algorithms, DBMS/**SQL**, Software Engineering, Operating Systems, Computer Networks, Machine Learning
- Availability:** Summer 2027 **summer internship** (May–Aug 2027) | **Preferred office:** Mumbai, Maharashtra, India

Experience

Operations & Software Engineering Intern
IFFCO (Indian Farmers Fertiliser Cooperative), Phulpur Unit, Prayagraj, India Jun 2025 – Jul 2025

- Supported **day-to-day operations** by **automating 50+ daily operational workflows** with **SQL/MySQL-backed services**—improving **accuracy and efficiency** of internal **transaction-like** requests and reducing manual handoffs.
- Built **10+ RESTful APIs** with validation controls, structured logging, and exception handling to protect against data errors, failed **settlements** of requests, and downstream **risk** to production users.
- Partnered with **cross-functional** managers and non-technical stakeholders to map **information flows**, document **processes**, triage production issues, and deliver reliable releases under tight timelines.
- Implemented **monitoring-friendly** logging, peer review, and **unit/integration tests** to keep operational systems running accurately after deployment.

Projects

LogiFlow — Multi-Modal Logistics Operations Platform (Google Solution Challenge 2026, Global Top 106) Apr 2026 – Jun 2026
Python, FastAPI, SQL, Redis, GCP Cloud Run, pytest, process validation GitHub | Live

- Engineered monitored data **processes** across **580+ corridors** and **9,526 stations**; **reengineered** hot paths to **100–400 ms** while preserving service **accuracy**.
- Authored **100/100** automated business-rule validations—control-style checks that prevent incorrect routing outcomes and support operational reliability at scale.

Community Hero — Civic Operations & SLA Workflow Platform (Google Vibe2Ship 2026, Global Top 20) Jun 2026
TypeScript, React, Express, Firebase, GCP Cloud Run, REST APIs GitHub | Live

- Built operational triage workflows with SLA routing, admin review queues, and audit-friendly status tracking—mirroring controlled handoffs from intake through resolution and reporting.
- Shipped production features with structured error handling and stakeholder-ready documentation for fast-paced delivery.

AirHelp — Real-Time Operations Monitoring Dashboard (PowerMind Hackathon 2026) 2026
Python, FastAPI, React, WebSockets, SQL, monitoring GitHub

- Developed **monitoring** and alerting for live operational load (**50–100 concurrent** users) with latency targets and root-cause-friendly logs for incident response.

Skills

Operations & Analytics: Process documentation, workflow automation, controls & validation, root-cause analysis, SLA tracking, attention to detail, Excel (analysis), SQL reporting
Technical: Python, SQL (MySQL, PostgreSQL), Java, JavaScript/TypeScript, Git, Linux, Docker, CI/CD, REST APIs, GCP Cloud Run
Core Strengths: Analytical problem-solving, probability & statistics foundation, data structures/algorithms, cross-functional communication, fast-paced learning, English (professional)

Achievements and Leadership

- LeetCode Knight:** Rating **2048**, **711+** solved — rigorous **analytical** and quantitative practice
- Codeforces Specialist:** Rating **1419**, **252+** solved (profile)
- McKinsey.org Forward Fellow (2026)** — business, operations, and professional skills program
- Google Solution Challenge 2026 — Global Top 106; Vibe2Ship 2026 — Global Top 20**
- ACM SVNIT Executive Member & Nexus DSA Mentor** — training peers and leading structured sessions
