Education

Bachelor of Technology in Artificial Intelligence (Engineering)

CGPA: 9.20/10

Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat, India

Expected May 2028

- **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming (Java), Software Engineering, DBMS, Operating Systems, Computer Networks
- **Availability:** Summer 2027 Technology Program Internship (May 2027 – August 2027) | Requisition R-557386

Experience

Software Engineering Intern

IFFCO (Indian Farmers Fertiliser Cooperative), Phulpur Unit, Prayagraj, India

Jun 2025 – Jul 2025

- Delivered production web services through the full **SDLC** with cross-functional stakeholders: requirements gathering, design, implementation, **unit testing**, and deployment (**Python, Node.js, MySQL, SQL**) on **Linux** with **Docker** and **CI/CD**.
- Built **10+ RESTful APIs** with optimized **SQL** (indexing, joins); automated **50+ daily operational workflows** with authentication, input validation, and structured error handling—improving reliability and visibility for internal users.
- Conducted debugging, peer **code review**, and production issue triage; communicated technical status and trade-offs to managers and non-engineering stakeholders.

Projects

LogiFlow – Logistics Decision Platform (Google Solution Challenge 2026, Global Top 106)

Apr 2026 – Jun 2026

Python, FastAPI, SQL, JavaScript, Next.js, Redis, GCP, pytest, Git

GitHub | Live

- Co-led backend development on GCP Cloud Run; scaled read paths to 100–400 ms across 580+ corridors using Redis caching and reusable service modules.
- Wrote pytest regression suite (100/100 business-rule validations); built ML delay model on 15,650 train-days with documented APIs for team delivery.

Community Hero – Civic Reporting Platform (Google for Developers Vibe2Ship 2026)

Jun 2026

TypeScript, React, Python, Express, Firebase, Cloud Run, REST APIs

GitHub | Live

- Shipped React PWA and Express API on **Cloud Run** with **Firestore, Firebase Auth**, and **REST endpoints** validated via Postman; delivered geo-tagged reporting, admin workflows, and map-based triage for production use.

AirHelp – Real-Time Airport Companion (PowerMind Hackathon 2026)

2026

Python, FastAPI, React, WebSockets, SQL, NetworkX

GitHub

- Built FastAPI backend with **WebSocket** real-time alerts and graph-based **A*** navigation; debugged and tuned **1–3s** response latency for **50–100 concurrent** users.

Technical Skills

Programming & Development: Python, Java, SQL, JavaScript, TypeScript, C++, C

Databases & Tools: MySQL, PostgreSQL, MongoDB, Redis, Docker, Git, CI/CD, REST APIs, GCP Cloud Run

Software Development Life Cycle (SDLC): Requirements analysis, design, coding, unit and integration testing, debugging, code review, documentation, Agile

Core Computer Science: Data structures, algorithms, object-oriented programming, DBMS, operating systems, computer networks, analytical problem-solving

Achievements

- **LeetCode Knight** (rating 2048, 637 solved) | **Codeforces Specialist** (rating 1419)

Ongoing

- **Google Solution Challenge 2026** — Global Top 106 (LogiFlow)

Jun 2026

- **Google for Developers Vibe2Ship 2026**; PowerMind Hackathon 2026; McKinsey.org Forward Fellow (2026)

2026

- Technical Lead, RangRiti (Web Wonders 2025); Executive Member, ACM SVNIT; Mentor, Nexus SVNIT

2024–Present
