WORK EXPERIENCE

SDE Intern, PayU – Bengaluru

May 2025 - July 2025

- Reduced backend load by optimizing Anti-Fraud System calls in the Pay-in-3 transaction flow, cutting redundant requests by **75%** without affecting functionality.
- Built and deployed high-performance backend APIs (Go-based service) for updating user credit configurations, serving **millions of requests** across core transaction services with low latency..
- Migrated **2500+ lines of backend code** from legacy merchant configuration tables to product configuration tables across multiple services, significantly improving scalability, maintainability, and deployment flexibility.

PROJECTS
