B.Tech Artificial Intelligence, SVNIT Surat | CGPA **8.75**/10 | 2024–2028

SUMMARY

Penultimate-year **B.Tech Artificial Intelligence** student at **SVNIT Surat** with strong foundations in **C/C++**, **Python**, **object-oriented design**, and **data structures & algorithms**. Designs, develops, tests, and deploys full-stack software end-to-end — from requirements through production — using **Python**, **JavaScript/TypeScript**, **FastAPI**, **Next.js**, and the **MERN** stack. Hands-on with applied **ML** (TensorFlow internship), real-time **SSE** streaming, and decision-intelligence features on **LogiFlow** (Google Solution Challenge 2026). Interested in scalable applications that combine reliable software engineering with applied AI.

EDUCATION

Sardar Vallabhbhai National Institute of Technology, Surat

2024–2028

Bachelor of Technology — Artificial Intelligence

CGPA: **8.75**/10

- **Relevant coursework:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Software Engineering, Machine Learning, Linux
- **Focus:** analytical problem-solving, clean software design, REST APIs, and shipping production-style modules with Git

EXPERIENCE

Artificial Intelligence Intern

Mar–Apr 2025

Personify

Remote

- Designed, trained, and evaluated **TensorFlow** models for text classification, object detection, and pet-face classification — owned preprocessing through measurable outputs.
- Implemented landmark detection for key visual features; iterated on model quality with systematic debugging and experiment tracking.
- Collaborated in a fast-paced remote team; documented experiments and communicated tradeoffs clearly to mentors.

TECHNICAL PROJECTS

LogiFlow — Multi-Modal Logistics Decision Platform

Google Solution Challenge 2026

Python, FastAPI, TypeScript, Next.js, SSE, Redis, GCP Cloud Run / **GitHub** / **Live**

Full-stack decision-intelligence platform that compares road, rail, air, water, and hybrid cargo routes with priority-weighted scoring and Pareto ranking.

- Owned **Route Composer**, **rail** pipeline, and **SSE streaming** — design through debugging of chained multimodal itineraries and live progress updates.
- Built full-stack modules that normalize multi-pipeline outputs into one schema; ranking for cheapest / fastest / safest picks with plain-language AI explanations.
- Shipped production paths on **Vercel** / **GCP Cloud Run** with API contracts, feature scoping, and technical documentation for the Neural Foundry team.

Community Hero — Civic Reporting PWA

Vibe2Ship 2026 — Global Top 20

HTML, CSS, JavaScript, React, TypeScript, Express, Firebase / **GitHub** / **Live**

Mobile-first civic reporting app for hyperlocal urban issues (potholes, leaks, streetlights, waste) with maps, verification, and live tracking.

- Built report intake, map-based visualization, and community verification flows as a production-style **React** PWA.
- Integrated REST APIs, Firebase-backed auth/data, and cloud deploy; learned Maps and Firebase under fast-paced hackathon constraints.
- Delivered demo-ready navigation, issue timelines, and user-facing error handling for a complete civic-reporting journey.

EasyBook — Movie Ticket Booking Platform

Live

MongoDB, Express.js, React.js, Node.js (**MERN**)

End-to-end ticket-booking product covering catalog, authentication, seat selection, and a complete checkout-style booking journey.

- Developed movie browsing, theater listings, releases, trailers, and user login with a responsive **React** UI.
- Implemented interactive seat selection and booking workflow with structured page navigation and session-aware user flows.
- Deployed a production build on **Vercel** with modular frontend/backend separation (OOP-style component and API boundaries).

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, TypeScript

Frontend: HTML, CSS, React.js, Next.js

Backend: Node.js, Express.js, FastAPI, Django

Databases: MongoDB, Redis, SQL / DBMS

Core CS: Data Structures & Algorithms, Object-Oriented Design, Operating Systems, System Design, Linux

Machine Learning: TensorFlow, data preprocessing, model training & evaluation

Tools & Deploy: Git, GitHub, REST APIs, SSE streaming, MERN stack, Vercel, GCP Cloud Run, Render

Interests: Full-stack engineering, cloud-backed products, applied ML, production-quality UI

ACHIEVEMENTS & LEADERSHIP

- **Google Solution Challenge 2026** — LogiFlow (Neural Foundry); full-stack: Route Composer, rail, SSE, decision intelligence
- **Google for Developers Vibe2Ship 2026** — **Global Top 20** — Community Hero civic reporting PWA
- Core Member, BIS Student Chapter, SVNIT Surat — campus standards awareness and chapter activities
