Hiring Team

GEP Worldwide

Intern – Technology (Software Engineer / Associate Data Scientist)

Hyderabad / Mumbai, India

Re: Application for Intern – Technology

Dear Hiring Team,

I am applying for the Intern – Technology role at GEP Worldwide. I am a penultimate-year B.Tech Artificial Intelligence student at SVNIT Surat (CGPA 9.20/10, graduating May 2028) and I am available for a full-time internship in Hyderabad or Mumbai. GEP's work at the intersection of enterprise software, large-scale operational data, and AI-powered procurement is exactly where I want to build.

At IFFCO, I shipped production Node.js/Express/MySQL services and 10+ REST APIs that automated 50+ daily workflows, with Git, Docker, and CI/CD. On LogiFlow (Google Solution Challenge 2026 Global Top 106), I co-led backend services on GCP Cloud Run with Redis caching and a 100/100 pytest suite over 15,000+ records. I also solo-shipped Community Hero (Vibe2Ship Global Top 20) and built RAG systems in AirHelp—I own features from design through deployment and can explain every technical choice on my resume.

I bring strong fundamentals in DSA (LeetCode Knight, peak 2048), DBMS/SQL, OOP, and clear communication as Chairperson of Nexus SVNIT. I would welcome the opportunity to contribute to GEP's technology team and learn from your engineers. Thank you for your consideration.

Sincerely,

Ojas Srivastava
