

SUMMARY

Artificial Intelligence undergraduate experienced in quantitative research, machine learning, and scalable software. Built algorithmic trading strategies, developed predictive time-series models, and engineered real-time analytics platforms processing large-scale market data. Skilled in Python, C++, SQL, deep learning, and full-stack development.

EDUCATION

Sardar Vallabhbhai National Institute of Technology, Surat	2024 - Present
Bachelor of Technology in Artificial Intelligence	CGPA: 7.14 (Current)
GEMS Our Own English High School	2024
Senior Secondary, Central Board of Secondary Education	Percentage: 85%

EXPERIENCE

Batra Hedge	May 2026 - June 2026
Quantitative Research Intern	
- Developed a regime-switching ML trading strategy for NIFTY 50 using Random Forest. Achieved 393% return, 2.04 profit factor, and 57% win rate over 410 trades, utilizing dynamic position sizing based on market regime and model confidence. - Designed and backtested a quantitative NIFTY options strategy using trend-regime detection, VWAP/RSI/IV-based signal generation, and adaptive exit logic, delivering 427.95% cumulative return, 83.72% win rate, and 2.97% maximum drawdown over 1,327 trades during a 6-year walk-forward simulation.	

National Institute of Technology Puducherry	May 2026 - June 2026
Research Intern	
- Conducted research on Air Quality Index forecasting using machine learning and deep learning models, including XGBoost, LSTM, CNN-LSTM, and hybrid ensemble architectures. - Implemented Ridge Regression using RidgeCV for automatic hyperparameter tuning via cross-validation, achieving the highest predictive performance among evaluated models with $R^2 = 0.9274$, MAE = 23.9974, and RMSE = 32.7594.	

PROJECTS

Genesis – Institutional Equity Analytics Dashboard	June 2026
TypeScript, Next.js, React, PostgreSQL, TradingView Lightweight Charts, Python	Github Live Demo
- Engineered a Bloomberg Terminal-inspired equity analytics platform delivering real-time market intelligence for NIFTY 50 and 100+ mid-cap stocks. - Integrated TradingView Lightweight Charts to render interactive candlestick visualizations at 60 FPS, supporting 10,000+ historical and real-time market data points for technical analysis and research workflows. - Developed Smart Money Concepts (SMC) analytics for automated detection of Fair Value Gaps (FVG), Break of Structure (BOS), liquidity sweeps, and market structure shifts with sub-100ms processing latency.	

TerraShield: AI-Powered Property Loan Fraud Intelligence	Canara Bank Hackathon 2028
Python, React, Next.js, FastAPI, OpenCV, Ollama	GitHub
- Reduced fraud verification from 3–5 days to <120 seconds via a 5-stage AI pipeline processing 20+ document types with 95% confidence. - Engineered forensic modules (OpenCV ELA, SSIM signature matching) and financial models (Beneish M-Score, Altman Z'-Score) to detect document tampering and earnings manipulation. - Built full-stack platform with Next.js 15 + FastAPI, integrating Qwen2.5 3B LLM for automated risk narratives and a logarithmic convergence scoring engine.	

TECHNICAL SKILLS

Programming Languages: C/C++, Python , HTML, CSS, JavaScript, SQL, R Machine Learning & AI: Scikit-learn, NumPy, PyTorch, OpenCV Frontend & Tools: React, Next.js, Tailwind CSS, Streamlit, Postman Backend & APIs: FastAPI, Node.js, REST APIs , Django, WebSockets, JWT authentication Databases & Vector DBs: SQLite, PostgreSQL, MongoDB, Pandas, FAISS, Pandas, Redis Tools & Platforms: Git, GitHub, Docker, CUDA, Jupyter Core CS Fundamentals: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOPs	
--	--

ACHIEVEMENTS

4th Place, 72-Hour Datathon (Petrichor’26) – IIT Palakkad: Ranked 4th out of 90+ teams in a national-level data science competition (Code for Climate Action).	Jan. 2026
Finalist, CodeVersity – IIT Gandhinagar: Selected as a top team for Ishara AI, a bidirectional ISL translation system.	Feb. 2026
2nd Place, SuRaksha Hackathon 2.0 Canara Bank at IISc Bangalore: Built TerraShield, an AI-powered real-time fraud detection platform for property loan underwriting.	Jul. 2026
