

ADWAITHA SIVARAJ

AI | Data Analytics | Full-Stack Development

EXPERIENCE

Retail Analytics Intern | Lulu Group (Loyalty Department)

Python | Streamlit | Gemini API | Pandas

June 2026 - July 2026 | Abu Dhabi UAE

- Built an AI-powered retail decision intelligence platform to support assortment optimization and product portfolio reviews.
- Developed an explainable recommendation engine that generated Keep, Block, and Delist actions using sales performance indicators, business rules, and confidence-based scoring.
- Integrated Generative AI to deliver natural-language explanations and actionable insights, improving recommendation transparency and user trust.
- Integrated Gemini AI-powered conversational analytics enabling natural-language exploration of product performance, recommendations, and review history.
- Automated product review workflows, decision tracking, and audit history management, replacing manual Excel-driven processes.
- Designed multi-dimensional analytics capabilities across categories, brands, regions, and stores to support data-driven assortment decisions.
- Collaborated with business stakeholders to align platform functionality with operational retail review processes and decision-making requirements.

PROJECTS

Automated Invoice Analysis & HSN-SAC Extraction System

- Built a multi-layer OCR and document intelligence pipeline to automate invoice processing across diverse formats.
- Automated extraction and validation of GSTINs, invoice details, tax values, and HSN/SAC codes using pattern matching and compliance checks.
- Achieved 99% HSN/SAC extraction accuracy and reduced manual data entry effort by 80%+.
- Developed structured JSON storage workflows in MongoDB to support analytics and compliance monitoring.
- Developed GST compliance verification workflows to validate CGST, SGST, and IGST percentages and detect discrepancies between taxable values and calculated tax amounts.

REVA Fashion Platform

- Developed a sustainable fashion platform enabling students to exchange, rent, and purchase pre-owned clothing through a community marketplace.
- Implemented gamified engagement features including fashion challenges, community voting, rankings, and reward mechanisms to encourage participation.
- Built scalable full-stack functionality using the MERN stack, Firebase services, and responsive UI design principles.

EDUCATION

SVNIT

B.Tech Artificial Intelligence

2024-2028

SKILLS

Languages

- Python, SQL, JavaScript, C

Data & AI

- Gemini API, OCR, Pandas, NumPy

Frameworks

- Streamlit, Django, React, Node.js

Databases

- MongoDB, MySQL, Firebase

Tools

- Git, GitHub, Azure AI Vision

ACHIEVEMENTS

- Smart India Hackathon 2025
Round 1 Shortlisted
- Finnovate Hackathon, IIT
Gandhinagar
- IELTS Academic Band 8
