Education

Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat

2024 – Present

B.Tech in Artificial Intelligence

CGPA: 9.19 / 10

Research Experience

SemEval 2026 Task 5: Rating Plausibility of Word Senses

Published Paper

Tech Stack: PyTorch, Hugging Face, DeBERTa-v3, FLAN-T5, RoBERTa, WordNet, HPC/SLURM

- Developed and evaluated Transformer-based systems for graded word-sense plausibility prediction on the **AmbiStory dataset** (2,280 train / 588 dev / 930 test samples).
- Implemented a **DeBERTa-v3-Large cross-encoder** with attention-weighted pooling and hybrid ordinal-regression loss, achieving **0.718 Spearman** on 5-fold development cross-validation.
- Designed a **FLAN-T5 + RoBERTa ensemble** with rank-based fusion achieving **0.692 Spearman** on 5-fold development cross-validation.
- Modeled annotator disagreement using uncertainty-weighted loss and cumulative ordinal thresholds for 1-5 plausibility ratings.
- Conducted 5-fold stratified cross-validation and evaluated models using Spearman, Pearson, MAE, and RMSE.
- Optimized DeBERTa training using layer freezing and mixed-precision FP16/FP32 on H100 GPUs, reducing trainable parameters from 435M to 52M.

Projects

Basho — Full-Stack E-Commerce Platform

Live — GitHub

Dec 2025

Tech Stack: Next.js, React, TypeScript, Tailwind, MongoDB, Firebase, Razorpay, Cloudinary

- Spearheaded a **full-stack e-commerce platform** supporting products, workshops, exhibitions, and collaborations.
- Implemented **multi-method authentication** using Firebase OAuth, Google OAuth, OTP, and JWT with **role-based access control** across REST APIs.
- Implemented **Razorpay payment workflows** with order verification, webhooks, GST calculation, shipping automation, and COD support.
- Built an **admin dashboard** for managing products, orders, workshops, and exhibitions with **Cloudinary** and **Nodemailer** integration.

Civic Service Radar — AI-Powered Civic Governance Platform

Demo Video

Mar 2026

Tech Stack: Next.js, React, Tailwind CSS, Node.js, MongoDB, FastAPI, Python ML

- Developed an **AI-powered civic governance platform** with an end-to-end complaint pipeline for text, audio, and PDF inputs, supporting **multilingual processing** using **NLLB-200** and **MiniLM-L6-v2**.
- Developed a **queue & distance optimization system** using geospatial scoring and **YOLOv8s** for real-time wait-time estimation.
- Designed a **semantic complaint intelligence engine** for classification, clustering, and priority scoring to enable intelligent department routing.
- Integrated **Gemini 2.0 Flash** for OCR and eligibility matching across a **large set of government schemes**.

Skills

Programming Languages: C++, Python, JavaScript, C, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, REST APIs

Databases & Cloud: MongoDB, Firebase

Machine Learning/NLP: PyTorch, Hugging Face Transformers, DeBERTa-v3, RoBERTa, FLAN-T5

Developer Tools: Git, GitHub, VS Code

Core CS: Data Structures and Algorithms, Database Management Systems, Object Oriented Programming, Operating Systems, Computer Networks

Achievements

- Winner — **WebWonders 2025 (Traditional Arts Theme)**, SVNIT.
- **Published Research Paper** — SemEval 2026 Task 5 (International NLP Shared Task).
- Secured a **Top 8** position among **150+ teams** at the national-level **DotSlash 9.0 Hackathon**, ACM SVNIT.

Leadership Experience

• **Junior CDC Coordinator** — Training & Placement Cell, SVNIT

May 2026 – Present

• **Designer** — ACM Student Chapter, SVNIT

Dec 2025 – Present

• **Co-Head** — Design Committee, Mindbend, SVNIT

Dec 2025 – Mar 2026
