Education

Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat 2024–Present Bachelor of Technology in Artificial Intelligence **CGPA: 9.1/10.0** (Till Semester IV)
Relevant Coursework: Data Structures and Algorithms, Operating Systems, Computer Networks, Database Management Systems, Artificial Intelligence

Experience

AI/ML Intern — NewStreet Technology May–July 2026 *AWS Bedrock, ChromaDB, PostgreSQL, Redis*

- Developed a multimodal RAG-based support assistant with context-aware retrieval across enterprise sources.
- Improved retrieval quality by implementing semantic chunking, embedding optimization, and multi-collection retrieval strategies for enterprise knowledge bases.
- Built semantic retrieval, document ingestion, and conversation memory pipelines using ChromaDB, PostgreSQL and Redis and integrated OCR, speech-to-text and voice based queries using SARVAM

Research Experience

SemEval-2026 Task 4: Narrative Story Similarity and Narrative Representation Learning Jan 2026–Present [GitHub](#)

PyTorch, Hugging Face, SBERT, TF-IDF, BGE-Large, E5, DeBERTa, Contrastive Learning

- Designed a semantic similarity framework integrating SBERT+TF-IDF embeddings, BGE-Large, and Siamese contrastive learning for robust pairwise ranking on 2000+ narrative samples.
- Fine-tuned a DeBERTa cross-encoder using joint regression and contrastive objectives for continuous prediction.
- Optimized GPU training through mixed precision, gradient accumulation, and structured hyperparameter tuning across multiple encoder architectures.

Projects

Rabuste Café — Google Winter Of Code [GitHub](#) — [Live](#) 2025 *MongoDB, Express.js, React.js, Node.js, Tailwind CSS*

- Created a full-stack e-commerce platform with product browsing, order management, and cart functionalities with secure payment gateway integration.
- Implemented an administrative dashboard with CRUD operations and structured backend services.
- Integrated responsive UI components using Tailwind and optimized client-side rendering for improved usability.
- Applied AI-driven recommendation configuration logic in backend services.

Civic Service Radar — AI-Powered Civic Governance Platform

[Demo](#)

Next.js, React, Tailwind CSS, Node.js, MongoDB, FastAPI, Python ML

- Engineered an AI-powered civic governance platform for public service navigation, complaint analysis, and government scheme recommendations.
- Architected a geospatial queue optimization engine with multilingual complaint processing (text, audio, PDF) for automated clustering and department-wise routing.
- Integrated LLM-based scheme matching, intelligent document parsing, and RBA dashboards

Technical Skills

Programming Languages: Python, C++, JavaScript, C

Web Development: React.js, Next.js, Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, Tailwind

AI / Machine Learning: PyTorch, Hugging Face Transformers, Scikit-Learn, Natural Language Processing, Deep Learning, Retrieval-Augmented Generation (RAG), Semantic Similarity Modeling, Contrastive Learning, Feature Engineering, Model Evaluation

Databases: MongoDB, SQLite, ChromaDB,

Achievements

- Secured **Top 8 position among 550+ teams** in the **DotSlash Hackathon**
- Selected among the **Top 106 teams nationwide** in the **Google Solution Challenge 2026** for *LogiFlow*, an AI-driven multimodal logistics optimization platform.
- **Winners** — Web Wonders 2025 for *KalaSangam*.

Positions of Responsibility

- Student Representative and Mentor – Nexus (CSE-AI Departmental Cell), SVNIT
- Junior CDC Coordinator — Training and Placement Cell (Career Development Cell), SVNIT
- Developer at NSS SVNIT

2024–Present
