EDUCATION

Sardar Vallabhbhai National Institute of Technology
B.Tech in Artificial Intelligence; CGPA: 8.01

Surat, Gujarat
2024 – Present

EXPERIENCE

Junior Software Development Intern

May 2025 – July 2025

Fastrac, Indonesia

Remote

- Developed Shopify workflows and API integrations, resolving B2B UI/UX and production issues with remote teams.

Junior Cyber Security Intern

May 2025 – July 2025

CDAC, Noida

Remote

- Performed disk forensics (Autopsy, FTK Imager) and network/security assessments (Nmap, Nessus, Wireshark) to extract cloud traces and credentials and build attack timelines.

TECHNICAL SKILLS

Languages & Core: Python, JavaScript, C++, C, HTML/CSS, Data Structures & Algorithms

Frameworks & Tools: React, Next.js, Node.js, Express.js, Django, Git, Firebase, MongoDB

RESEARCH PUBLICATIONS

Multilingual IndicGEC | *ACL Anthology (BHASHA Shared Task)*

2025

Paper Link | Authors: Manav Dhamecha, Gaurav Damor, Pruthwik Mishra

- Proposed mT5 and IndicBART models for grammatical error correction across 5 Indic languages using novel synthetic data augmentation, achieving competitive GLEU scores up to 86.03.

Fine-tuning Multilingual Transformers for Indic Word Grouping | *ACL Anthology*

2025

Paper Link | Authors: Manav Dhamecha, Gaurav Damor, Pruthwik Mishra

- Formulated Indic word grouping as token classification by fine-tuning MuRIL, XLM-Roberta, and IndicBERT v2, achieving 58.18% Exact Match accuracy on the official test set.

PROJECTS

Genesis | *FastAPI, LangGraph, Gemini, Vertex AI, PostgreSQL/pgvector, Redis*

2025

- Built the FastAPI backend and LangGraph multi-agent orchestration pipeline (Planner, Coordinator, Executor, Reviewer, Safety) for a multi-tenant AI content generation platform, powering intent classification and automated routing across blog, image, and social workflows.
- Built a multi-provider LLM factory abstracting Gemini, GPT-4o, and Llama 3.3 (via Groq) behind a unified interface, backed by a multi-layer guardrails system for bias detection, harm filtering, and factual grounding.
- Designed a two-tier caching architecture (Upstash Redis + PostgreSQL prompt cache) with pgvector-based RAG for conversation memory, and deployed the backend to GCP Cloud Run.

Trendora | *Next.js, Firebase, LangChain, FastAPI, WebRTC* | GitHub

2025

- Architected a 40-page AI fashion platform with a Firestore-backed RBAC system for Admin, Merchant, and Creator roles.
- Integrated the Leffa diffusion model via a GPU-optimized FastAPI microservice for AI-powered virtual try-on.
- Built an e-commerce stack with Razorpay, Socket.io live chat, LiveKit streaming, and a Gemini AI advisor chatbot.

Prometheus | *Next.js, FastAPI, LightGBM, Ollama, PyTorch* | GitHub

2025

- 1st place winner at Adani Hackathon 2K26 for an AI-powered intelligence platform for smart energy grid management.
- Engineered real-time demand forecasting and anomaly detection (LightGBM) with PyTorch-based ML pipelines and Ollama-powered local LLM inference for explainable, agent-assisted decision support.

ACHIEVEMENTS & LEADERSHIP

Hackathons: Secured 1st Rank at National Level Hackathon Echelon 2K26; Secured 1st Rank at Adani Hackathon 2K26; Top 40 team (out of 2000+) at MindBend.

Positions of Responsibility: Vice-Chairperson (CEV (Fintech Club), SVNIT), Junior Developer (GDG SVNIT), Executive (ACM NIT Surat), Representative (Nexus DoAI Cell), Co-Head (MindBend).
