PROFILE

Aspiring AI Engineer and 2nd-year B.Tech student specializing in Artificial Intelligence. Strong foundation in Python, machine learning, and web development with hands-on project experience. Actively seeking an internship to apply problem-solving skills and gain real-world AI/ML exposure.

EDUCATION

National Institute of Technology, Surat

Gujarat, India

Bachelor of Technology in Artificial Intelligence

2024 - Present

- CGPA: 6.6 (PRESENT)
- Relevant coursework: Data Structures, DBMS, Operating Systems, Web Development, Introduction to Artificial Intelligence (AI), Linear Algebra, Discrete Mathematics

SKILLS

Programming Languages: Python, C++

Web Technologies: HTML, CSS

Databases: SQL

Data & Analytics: Statistics, ETL, Data Visualization, Machine Learning

Tools & Platforms: GitHub, VS Code

Soft Skills: Problem Solving, Team Collaboration, Communication, Time Management

PROJECTS

Wari Bandhu (Front End Web Project)

- Created an attractive, user-friendly website for Pandharpur Wari, featuring palkis information, Sant details, and motivational content.
- Implemented responsive design and interactive visuals using HTML, CSS, and JavaScript.
- Enhanced community engagement by providing devotees with a visually immersive experience.

Crowd & Comfort Prediction – Personal ML Project

- Built a personalized ML model predicting crowd comfort based on user preferences for noise, crowd size, temperature, humidity, and seating.
- Generated a synthetic dataset with footfall, weather, traffic, events, and engineered features like Crowd Pressure and Cyclical Time Encoding.
- Developed a Random Forest pipeline with SMOTE, scaling, and one-hot encoding, validated with 5-fold cross-validation.
- Analyzed results with classification metrics, confusion matrices, and feature importance to highlight key comfort factors.
