EDUCATION

Sardar Vallabhbhai National Institute of Technology (SVNIT)

B.Tech in Artificial Intelligence

CGPA: 8.0/10

Surat, Gujarat

2024 – 2028

TECHNICAL SKILLS

Languages: C++, C, Python, JavaScript

Core CS: Data Structures & Algorithms, Operating Systems, Object-Oriented Programming, Database Management Systems, Computer Networks, Computer Organization & Architecture

Concepts: Competitive Programming, Problem Solving, Time & Space Complexity Analysis, Object-Oriented Design, Modular Programming

Libraries & APIs: C++ STL, NumPy, Pandas, OpenAI API, Speech-to-Text, Text-to-Speech

Frameworks: Django, React

Developer Tools: Linux, Git, GitHub, VS Code

Databases: MySQL, MongoDB

Areas of Interest: Competitive Programming, Software Engineering, High Performance Computing, Algorithms, Systems Programming, Artificial Intelligence

EXPERIENCE

Web Wonder Software Development Competition

2025

Team Lead (Finalist)

- Led a team of four members in designing and developing a full-stack web application.
- Managed task allocation, backend integration, and project presentation.
- Successfully reached the Finalist stage among participating teams.

PROJECTS

Eduace-AI Academic Assistant | *Python, Django, HTML, CSS*

- Developed an AI-assisted academic platform to help students organize academic resources and study plans.
- Implemented secure user authentication and authorization using Django.
- Designed modular backend architecture following the MVC framework.
- Integrated frontend with backend services and optimized database operations.
- Used Git for version control and collaborative development.

Beneath the Blue-Marine Awareness Platform | *Python, Django, JavaScript, HTML, CSS*

- Developed a full-stack web application to spread awareness about marine ecosystems.
- Built secure authentication, dynamic quizzes, and score tracking modules.
- Implemented backend logic for quiz evaluation and user history management.
- Designed responsive user interfaces integrated with backend APIs.
- Followed modular software design practices to improve maintainability.

AI Video Testimonial Platform (Hackathon Project) | *Python, React, OpenAI API, Speech-to-Text, Text-to-Speech*

- Developed an AI-powered platform that conducts interactive video interviews to collect customer testimonials.
- Integrated the OpenAI API to generate context-aware interview questions and conversational interactions.
- Implemented Speech-to-Text for converting user responses into text and Text-to-Speech for AI-driven voice interactions.
- Generated AI-assisted short testimonial videos from interview recordings for social media and promotional use.
- Collaborated with a team during a hackathon to design, develop, and integrate frontend and backend components using Git.

COMPETITIVE PROGRAMMING

LeetCode

- Solved 320+ Data Structures and Algorithms problems using C++.
- Practiced problems across Graphs, Trees, Dynamic Programming, Binary Search, Greedy Algorithms, and STL.
