PROJECTS

Objective Management Portal – OMP [Live Demo](#)

- OMP is a Goal Setting & Tracking Portal developed to solve these problems by creating a centralized digital platform
- The system allows employees to create and track goals, managers to review and approve them, and admins to manage cycles and governance. It supports quarterly check-ins, shared goals, progress tracking, reports, and audit logs to make performance management easier, transparent, and organize.

Expense Tracker Web App [Live Demo](#)

- Built a full-stack web application for tracking personal and shared group expenses with secure user authentication.
- Implemented group creation, shared expense entry, and automatic cost distribution among group members.
- Enabled expense management (add/edit/delete) and transaction history with a fully responsive interface.

DRISTI – Line Follower Robot

- Built an autonomous robot using IR sensors and L293D motor driver IC for accurate line detection and navigation.
- Collaborated as part of a team to design, prototype, and test the navigation system end-to-end.

Hostel Management System

- Developed a full-stack web app using Python, Django, SQLite, HTML, CSS, and JavaScript.
- Implemented student and admin login, profile management, complaint system, and an admin dashboard panel.

Weather Forecast Web App [Live Demo](#)

- Created a responsive frontend app using HTML, CSS, and JavaScript integrated with the OpenWeatherMap API.
- Provides current, hourly, and 5-day forecasts, location-based updates, and a °C/°F toggle.
