Professional Summary

Motivated Artificial Intelligence undergraduate at SVNIT with strong technical foundations in programming, data structures, algorithms, machine learning and deep learning. Passionate about solving complex problems, building scalable software systems, and continuously refining predictive models through competitive programming, Kaggle competitions, and hands-on software development.

Education

Sardar Vallabhbhai National Institute of Technology (SVNIT) | Surat, Gujarat

- **Degree:** Bachelor of Technology (B.Tech) in Artificial Intelligence (2024 – Present)
- **Academic Performance:** CGPA: 8.53

Vidyamandir Trust | Palanpur, Gujarat

- **Degree:** Higher Secondary Certificate (H.S.C.)

Technical Skills

- **Programming Languages:** C++, Python, Java (Basic)
- **Data Structures & Algorithms:** Dynamic Programming, Greedy Algorithms, Graph Theory, Trees, Heaps, Disjoint Set Union (DSU), Arrays, Strings, Trie
- **Machine Learning , AI & Deep Learning:** Supervised & Unsupervised Learning (Regression, Classification, Decision Trees, Gradient Boosting, Support Vector Machines), Deep Learning, Feature Engineering, Model Evaluation & Hyperparameter Tuning
- **Web Development & Systems:** Django, HTML, CSS, Computer Networking fundamentals, Linux, Operating System concepts
- **Tools & Platforms:** Git, GitHub, Docker, VS Code, Kaggle

Projects & Practical Experience

Customer Churn Prediction Model

- Developed an end-to-end machine learning pipeline to predict customer churn, leveraging advanced feature engineering, hyperparameter tuning, and ensemble learning techniques.

Content-Based Movie Recommendation System

- Designed and deployed a personalized recommendation engine utilizing similarity matrix algorithms to analyze content features and deliver accurate movie suggestions.

Credential Manager Web Application

- Built a secure credential management web application utilizing Django with encrypted password storage, robust user authentication, and full CRUD functionality.

Interactive Expense Tracker

- Created a modern financial tracking application featuring secure transaction management, customized budgeting tools, and interactive data visualization dashboards.

Algorithmic & Competitive Programming

- **LeetCode & Codeforces:** Solved over 400+ algorithmic problems across dynamic programming, graph theory, trees, and greedy algorithms, consistently improving competitive ratings and algorithmic efficiency.
- **Kaggle Competitions:** Actively participated in 10+ machine learning competitions, achieving a top 800 leaderboard ranking through rigorous experimentation, data preprocessing, and predictive modeling.

Leadership, Achievements & Soft Skills

- **Event Organizer, Mindbend:** Organized and hosted "Bazaar Blitz," a major campus managerial and barter challenge event during SVNIT's annual technical festival.
- **Strategic Problem Solver:** Applies structured analytical thinking to break down complex engineering challenges and optimize algorithm runtime performance.
- **Team Collaboration & Adaptability:** Rapidly adapts to emerging ML/DL frameworks and collaborates effectively with team members and technical mentors to execute multi-faceted projects under tight deadlines.
