

LEON SIMON LOBO

+91-9372087313 leonsimonlobo@gmail.com LinkedIn GitHub LeetCode

Education

Sardar Vallabhbhai National Institute of Technology, Surat.

Aug 2024 – May 2028 (Expected)

Bachelor of Technology in Artificial Intelligence

CGPA: 8.98 (Till Sem 4)

Projects

Orion | Website | GitHub

July-Aug 2026

Technologies: Python, React, NetworkX, XGBoost, Cytoscape.js, PostgreSQL

- Built **Orion (e-Rakshak)**, a full-stack **OSINT link-analysis and suspect correlation engine** for cybercrime investigations, with a **FastAPI/PostgreSQL** backend and **React (Vite) + TypeScript** frontend automating ingestion and dossier generation.
- Designed a **pluggable OSINT connector registry** integrating **19 external intelligence sources** (WHOIS/RDAP, crt.sh, HIBP, WhatsMyName) via an **asyncio.gather**-based concurrent fan-out architecture.
- Implemented a **NetworkX link correlation engine** combining a **Fellegi-Sunter baseline** with an **XGBoost refinement layer** to score edges, disambiguate aliases, and flag **pivot entities**.
- Built an interactive **React + Cytoscape.js** correlation graph and **react-globe.gl** geo-intelligence map, integrating **Groq LLaMA-3.3-70B** for case narratives/RAG chat and **Vision OCR**.
- Engineered **JWT auth**, live **WebSocket** case updates, and a signed **chain-of-custody audit log**, with one-click **JSON/CSV/PDF** reports on a **100% free-tier** (Vercel, Render, Neon) architecture.

RegWatch (SurakshaCanara) | GitHub

Jun-July 2026

Technologies: Python, FastAPI, Next.js, ChromaDB, Sentence-Transformers, SQLite

- Developed **RegWatch**, a multi-agent AI pipeline automating regulatory compliance for financial institutions, processing **RBI, SEBI, and MCA** circulars end-to-end.
- Engineered a fully **offline-first architecture** using local vector embeddings and semantic search, with zero external LLM API dependency.
- Built a **rule-based NLP extraction agent** for Mandatory Action Points and a **sentence-transformers**-based deduplication agent using cosine similarity.
- Built a **FastAPI backend and Next.js dashboard** with real-time re-escalation alerts, SLA tracking, and a fully audited activity log.

Gen-AI Content Creation | Website | GitHub

Feb 2026

Technologies: Next.js, LangChain, Django, Pexels API, Unsplash API

- Developed a full-stack **generative AI platform** for the **Genesis Competition**, collaborating in a **3-member team** using Next.js and Django.
- Engineered a **multi-format content generation pipeline** (Blogs, Tweets, YouTube Scripts, Reddit Posts, Instagram Captions) via **LangChain** and Groq-powered LLMs.
- Integrated **Unsplash and Pexels APIs** for image recommendations and **CKEditor 5** editing with one-click **PDF export**.

Technical Skills

Languages: Python, C++, C, JavaScript, HTML, CSS

Frameworks: Django, FastAPI, Next.js, React, Pygame

AI/ML: LangChain, XGBoost, NetworkX, Sentence-Transformers, ChromaDB, Groq, NumPy

Databases & Tools: PostgreSQL, MySQL, SQLite, Git/GitHub, Docker, Vercel, Render

Achievements

ICPC 2025

Waitlisted at **7th position** overall and **2nd position** in SVNIT in the ICPC 2025 Kanpur-region selection round.

Genesis Hackathon, SVNIT

Secured **3rd position** in a one-month, multi-club collaborative hackathon for building a scalable Gen AI application.

Positions of Responsibility

Event Lead, Nexus, DoAI & DoCSE Cell, NIT Surat

Aug. 2026 - Present

Mentor, Nexus, DoAI & DoCSE Cell, NIT Surat

Feb. 2026 - April 2026

Team Leader, RiddleFuse, Nexus, DoAI & DoCSE Cell, NIT Surat

Nov. 2025

Representative, Nexus, DoAI & DoCSE Cell, NIT Surat

Aug. 2025 - July 2026
