B.Tech in Artificial Intelligence

WORK EXPERIENCE

Open Source Contributor – ControlCore Project ([GitHub](#)) | Remote [Nov 2025 – Present]

- Core contributor to the **ControlCore Project**, an open-source framework for designing and managing distributed control-system workflows; authored and merged **60+ pull requests**, making me one of the **most active contributors in the project ecosystem**.
- Consistently contributed for over **5 months**, collaborating closely with maintainers, mentors, and fellow contributors through code reviews, architectural discussions, and coordinated feature development within the open-source community.
- Implemented and improved multiple system components including **frontend interfaces, backend services, feature modules, and internal libraries**, contributing to the stability and extensibility of the project.
- Developed strong expertise across **frontend engineering, backend development, and high-performance computing workflows**; optimized complex graph editor behaviors, resolved critical edge-case bugs, and contributed scalable implementations for computational and control-system tasks.

PROJECTS

JobGuru – AI-Powered Resume Generation Platform ([GitHub](#)) | Personal Project

- Architected a full-stack **AI SaaS** that auto-generates **ATS-optimized, job-tailored resumes** from a user profile and a pasted job description using a **multi-agent LangGraph pipeline**.
- Engineered a **17-node agentic graph** in Python with parallel fan-out across **5 concurrent section-writer nodes**, an **LLM-based critic** scoring resumes on 5 dimensions, and a conditional rewrite loop iterating until the ATS score threshold is met.
- Built an async REST API with **FastAPI, SQLAlchemy, and asyncpg**, using **Alembic-managed PostgreSQL** migrations, **BetterAuth** session verification, and a **ThreadPoolExecutor** to run the pipeline without blocking the event loop.
- Developed a **Next.js and React** frontend in **TypeScript** with **TanStack Query and Zod** validation inside a **Turborepo monorepo**, featuring a multi-step candidate-profile onboarding wizard.

Mindsettler ([Live](#) | [GitHub](#)) | GWOC 2025

- Developed a full-stack **Mental Health Wellness and Consulting platform** enabling users to access resources and connect with certified professionals.
- Designed and implemented a responsive frontend using **React.js and Tailwind CSS**, ensuring accessibility and user-friendly UI.
- Built secure **RESTful APIs** using **Node.js and Express.js**, implementing **authentication and role-based access** for users and counsellors.
- Managed database operations using **MongoDB**; utilized **Git and GitHub** for version control and collaborative development.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, Julia, MATLAB, OCTAVE, Verilog, Java, C, C++, HTML, CSS
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Next.js, FastAPI, TurboRepo (Monorepo), NumPy, Pandas, Matplotlib, Seaborn, TensorFlow, PyTorch
- **AI/ML & Agentic Systems:** LangGraph, LangChain, OpenAI API, Agentic Pipelines, Prompt Engineering
- **Databases & ORM:** MongoDB, PostgreSQL, Prisma, SQLAlchemy, Alembic, asyncpg
- **Developer Tools:** Git, GitHub, Docker, Kubernetes, Vercel, Postman, VS Code, Jupyter Notebook
- **Auth, Validation & State:** BetterAuth, Pydantic, Zod, TanStack Query
- **Build & Tooling:** TurboRepo*, Monorepo*, Vite*, Yarn*

**Elementary proficiency*

RELEVANT COURSEWORK

- Artificial Intelligence | Machine Learning | Operating Systems | Computer Networks
- Data Structures* | Computer Organization | Microprocessor and Interfacing Techniques
- Database Management Systems* | Design and Analysis of Algorithms* | Automata Theory and Formal Languages
- Data Science | System Design | Discrete Mathematics
- Linear Algebra and Statistics | Signals and Systems | Digital Electronics and Logic Design*
- Web Programming and Python* | Electrical Network Analysis* | Energy and Environmental Engineering*

**Includes laboratory component*

POSITION OF RESPONSIBILITIES

- Technical Head, Cutting Edge Visionaries
- Co-Head, Web Development, MINDBEND 2026.
- Executive Member, ACM and Cutting-Edge Visionaries Club.
