OBJECTIVE

Artificial Intelligence student and Full-Stack Developer with strong foundations in ML, searching for Software Engineering and AI/ML Internship/Full-Time roles.

EDUCATION

Bachelor of Technology in Artificial Intelligence, SVNIT(NIT SURAT) Aug 2024 - Present
GPA: 8.38/10.0

Higher Secondary Education (MPBSE), Narmada Vidhya Niketan School Jul 2022 - Apr 2024

SKILLS

Programming Skills:	Python, C, C++, JavaScript, HTML, CSS, SQL
Tools & Frameworks:	React, Node.js, Git, MongoDB, NumPy, Pandas, Matplotlib, Firebase, Stripe API
Core Concepts:	Deep Learning, Natural Language Processing, DSA, Full-Stack Development

PROJECTS

Joy Juncture. Built an integrated full-stack platform using MERN Stack, Firebase Auth, GCP, and Stripe API to connect digital engagement with event planning. Implemented gamified modules using Joy points and Joy Wallet alongside full CRUD management. ([Try it here](#))

Fashion Fiesta. Developed a responsive full-stack platform connecting student designers with users using JWT auth, Cloudinary hosting, dynamic content CRUD for donations, and an AI-powered navigation chatbot with an admin dashboard. ([Try it here](#))

AI-Produced Image Detector. Contributed to a team project building a full-stack AI system for detecting synthetic media by integrating ResNet transfer learning with a CNN-LSTM hybrid model using ensemble techniques.

RESEARCHES

SemEval-2026: Detecting Machine-Generated Code 2025 - 2026

• Co-authored research paper on AI-generated code detection accepted for conference publication. • Evaluated multi-subtask domain shifts, achieving competitive rankings: Ranked #7/30 in Subtask C, #12/31 in Subtask B, and #14/71 in Subtask A. • Conducted adversarial validation, identifying representation instability in 40% of transformer dimensions under domain shift.

ACHEIVEMENTS

Google Winter of Code (GDG SVNIT)

Top 3 Finalist (2025)

Finished in the top 3 teams for building the complete full-stack web application for the Joy Juncture startup.

AI-Produced Image Detector Challenge (CEV SVNIT)

1st Place (2025)

Secured 1st position by developing a hybrid AI ensemble model to classify synthetic images with 86% accuracy.

LEADERSHIP & EXTRA-CURRICULAR ACTIVITIES

- **Co-Head — CodeCraft, Mindbend (SVNIT Surat):** Organized and managed Mindbend's premier multi-round competitive coding competition, overseeing problem-setting, event execution, and participant logistics for 200+ coders.
- **Technical & Event Operations:** Directed screening quizzes, code-golfing rounds, and debugging challenges while leading a student team to ensure seamless platform operations.
