SUMMARY

Computer Science undergraduate with experience developing and deploying backend applications using Python, FastAPI, PostgreSQL, Redis, and Docker. Interested in backend engineering, distributed systems, and cloud infrastructure. Enjoy learning new technologies quickly and applying them to build reliable software.

EDUCATION

Sardar Vallabhbhai National Institute of Technology (SVNIT) <i>B.Tech in Artificial Intelligence; CGPA: 8.66</i>	2024 – 2028 Surat, India
Vidhyanjali Academy <i>Higher Secondary (Class XII) 92.2%</i>	2024 Kota, Rajasthan
JEE Main: AIR 13151 JEE Advanced: AIR 15013 Atmiya VidyaPeeth <i>Secondary (Class X) 96.2%</i>	2022 Gandhidham, Kutch, Gujarat

PROJECTS

TallyPort <i>Python, FastAPI, React, PostgreSQL, Redis, Docker, AWS EC2, Azure Document Intelligence</i>	2025 – Present
- Developed a SaaS platform that converts Indian bank statement PDFs into Tally-compatible XML using Azure Document Intelligence, reducing manual bookkeeping effort for chartered accountants - Designed a two-stage extraction pipeline using FastAPI, Celery, and Redis that returns transaction previews in ~10 seconds while processing the complete document asynchronously in the background - Implemented a FIFO page-credit system supporting stacked subscription plans with independent expiry, atomic credit deduction/refunds, and complete transaction history - Deployed and maintained the application on AWS EC2 using Docker Compose, configured Nginx with SSL - Authored custom TDL (Tally Definition Language) scripts inside TallyPrime for bulk ledger replacement, voucher-type reclassification, and narration control, required for imported vouchers to post correctly	

SKILLS

Languages: Python, JavaScript, C, SQL
Backend: FastAPI, Celery, REST APIs
Database: PostgreSQL, Redis
Frontend: React, TypeScript, Tailwind CSS
DevOps: Docker, Linux, Nginx, Git
Cloud & Services: AWS EC2, Azure Document Intelligence, Supabase Auth
Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, Artificial Intelligence
