SUMMARY

Artificial Intelligence undergraduate with hands-on experience in Machine Learning, Deep Learning, Computer Vision, and Frontend Development. Built and deployed AI-powered applications using TensorFlow, Scikit-learn, React, Node.js, and Docker, with experience in transfer learning, model optimization, and end-to-end deployment. Passionate about developing scalable software solutions and applying AI to solve real-world problems.

EDUCATION

- Sardar Vallabhbhai National Institute of Technology (SVNIT)** **Surat, India**
Bachelor of Technology in Artificial Intelligence; **CGPA: 7.17**
2024 – Present
- JEE Main 2024:** Secured **99.31 Percentile** (202 Marks) among 1.4M+ candidates.
- JEE Advanced 2024:** Qualified successfully (125 Marks) among top national engineering candidates.
- Relevant Coursework:** Machine Learning, Data Structures & Algorithms, Python for AI, DBMS, Web Technologies.

SKILLS

Programming Languages: Python, C, C++, JavaScript, TypeScript

Web Technologies: HTML, CSS, React.js

Machine Learning: Scikit-learn, Logistic Regression, Random Forest, Logistic Regression

Deep Learning: TensorFlow, Keras, ANN, CNN, Transformers, LSTM, RNN, VGG16

Computer Vision: Transfer Learning, EfficientNetB3, ResNet50

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Feature Engineering

Tools: Git, GitHub, VS Code, MySQL, Anaconda

PROJECTS

- AI vs Real Image Classifier** | *TensorFlow, Docker, Render* Live Demo | GitHub
 - Engineered a high-performance deep learning model for synthetic media detection using Transfer Learning and Image Preprocessing.
 - Containerized the application using Docker and deployed it on Render to provide a scalable, accessible web interface for image classification.
 - Evaluated multiple CNN architectures, achieving **91.75% Accuracy, 87.55% Precision, 97.35% Recall, 92.19% F1 Score**.
- Backpropagation Visualizer** | *Neural Networks, React, Interactive UI* Live Demo | GitHub
 - Developed an interactive web-based visualization tool to illustrate forward passes, loss calculation, and backpropagation in neural networks.
 - Designed clear visual representations of gradient flows and weight adjustments to enhance intuitive understanding of core deep learning mechanics.
 - Optimized user experience and responsiveness for seamless real-time experimentation with network parameters.
- AI Match Predictor** | *Scikit-learn, XGBoost, CatBoost* GitHub Repository
 - Designed an end-to-end classification pipeline for match outcome prediction through advanced Feature Engineering and Data Cleaning.
 - Implemented and compared Logistic Regression and gradient boosting algorithms (XGBoost, CatBoost) to optimize probability prediction accuracy.
 - Architected an efficient data processing workflow using Pandas and NumPy to handle complex categorical features and missing values.
- MindSettler Mental Health Platform** | *MERN Stack, JWT* mindsettler-taupe.vercel.app
 - Developed a secure mental health platform using MongoDB, Express, React, and Node.js with JWT authentication, securing 1st place in Google Winter of Code.
 - Engineered a responsive frontend and scalable backend communicating via a REST API, ensuring secure database interactions and user data privacy.

ACHIEVEMENTS & CERTIFICATIONS

- Genesis Hackathon:** Ranked among the **Top 5 teams** in collaboration with ACM and CEV SVNIT.
- Gridlock Hackathon 2.0:** Participated in the national-level event organized by **Flipkart**.
- Google Winter of Code (GWOC):** Awarded **Grand Winner** for technical contribution and application scalability.
- LeetCode:** Solved **280+ algorithmic problems** demonstrating strong data structure proficiency.
- GeeksforGeeks:** Solved **100+ algorithmic problems** focusing on competitive programming.

POSITIONS OF RESPONSIBILITY

- Sparsh, SVNIT** **Surat, India**
Co-Head, Infrastructure Team
Oct 2025 – Present
- Alumni and Training-Placement Affairs Council (ATPAC)** **Surat, India**
Coordinator
July 2025 – Present
