Education

Sardar Vallabhbhai National Institute of Technology (SVNIT)

Surat, Gujarat

Bachelor of Technology in Artificial Intelligence — CGPA: 8.53 / 10.0

2022 – Present

- Relevant Coursework: Data Structures, Design and Analysis of Algorithms, Operating Systems, Computer Organization & Architecture, Machine Learning, Linear Algebra, Probability & Mathematical Statistics, Artificial Intelligence.

Technical Skills

Languages: C++, C, Python, SQL

Core CS: Data Structures & Algorithms, Operating Systems, Computer Architecture

Systems & Tools: Git, GitHub, VS Code

AI / ML: Scikit-learn, FAISS, Pandas, NumPy, Matplotlib, Predictive Modeling

Web & Databases: MERN Stack, Next.js, Firebase, SQLite

Projects & Hackathons

Lumina: Intelligent Electricity Forecasting

Runner-Up (2nd Place)

Python, XGBoost, Llama 3.1, Scikit-learn

- Won 2nd Place out of competitive teams at the Adani PowerMind Hackathon (CDC SVNIT).
- Engineered an hourly energy-consumption forecasting system to model grid volatility in real time.
- Built a leakage-free, 1500-estimator XGBoost ensemble using cyclical temporal encodings, optimizing accuracy and runtime performance across 6 years of data.
- Achieved MAPE: 0.68%, MAE: 66.27, RMSE: 89.34, reflecting careful validation and performance tuning.
- Integrated Llama 3.1 for generative reasoning, enabling real-time natural-language anomaly queries.

Legality AI — Red Flag Detector

1st Place Winner

Python, Scikit-learn, FAISS

- Won 1st Place at Genesis Hackathon (organized by ACM × CEV × GDGC).
- Built an optimized NLP pipeline using semantic search and FAISS vector embeddings to efficiently extract risk clauses from legal text at scale.
- Designed a front-end visualization layer to surface relevance scores and confidence metrics.

Rabuste Cafe — Full Stack Web Application

Group Project

MERN Stack, RESTful APIs, Render

- Designed a responsive e-commerce platform with dynamic menus and secure pre-order capabilities.
- Built scalable Node.js/Express.js RESTful APIs and an intuitive React admin dashboard.

Achievements

- 1st Place, Genesis Hackathon (ACM × CEV × GDGC) — among multiple competitive engineering teams, for Legality AI.
- 2nd Place, PowerMind Hackathon (CDC SVNIT × Adani Group) — for a scalable forecasting architecture.
- Top 30, ACM Mirror Challenge.

Extra-Curricular Activities

- Solved 350+ problems on LeetCode and achieved a 1300+ rating on Codeforces.
- Participated in Hack The Tank 3.0 (GDGC SVNIT) and ODOO GCET Hackathon.
