

Kavya Jain

✉ jainkavya2517@gmail.com — 📍 Surat, Gujarat

Career Objective

Aspiring machine learning researcher with a strong foundation in mathematics, statistics, and programming. Seeking an internship to apply machine learning algorithms, predictive modeling, and data analysis techniques to solve real-world problems while gaining research experience.

Education

Sardar Vallabhbhai National Institute of Technology (SVNIT)

B.Tech in Artificial Intelligence

2024 – Present

Surat, Gujarat

– CGPA: 9.6

Methodist High School

Higher Secondary Certificate

2024

– Percentage: 96.25

Methodist High School

Senior Secondary Certificate

2022

– Percentage: 98.2

Skills

- **Programming Languages:** Python, C, Cpp
- **Machine Learning:** Scikit-learn, Supervised Learning, Regression, Classification
- **Data Analysis:** Pandas, NumPy
- **Data Visualization:** Matplotlib, Seaborn
- **Mathematics:** Linear Algebra, Calculus, Statistics, Probability

Projects

Price Prediction using Machine Learning (Regression)

- Built a regression-based machine learning model to predict computer prices using structured dataset features.
- Performed data preprocessing and exploratory data analysis using Pandas and NumPy.
- Implemented regression models including Linear Regression to predict computer prices.

Rainfall Prediction using Machine Learning (Classification)

- Developed a classification model to predict rainfall using historical weather data.
- Applied data preprocessing and exploratory data analysis techniques.
- Trained and evaluated classification models such as Logistic Regression, Decision Trees and Gradient Boosting using Scikit-learn.

Line Follower Robot using Arduino

- Designed and built an autonomous line-following robot using Arduino and IR sensors.
- Implemented control logic in Arduino C to process sensor input and adjust motor movement.
- Enabled real-time path tracking through sensor-driven motor control.

Extracurricular Activities

Lego Startup Event: Participated in a college startup competition focused on developing innovative startup concepts and entrepreneurial thinking.

BeyondBuzzin': Co-created a social media startup concept focused on creative digital engagement and content strategies, contributing to brainstorming and concept development.
