OBJECTIVE

Artificial Intelligence undergraduate at SVNIT with strong foundations in **C/C++**, **data structures & algorithms**, **operating systems**, **DBMS**, and **full-stack engineering**. Experienced in designing and deploying **scalable, production-grade software systems** with robust **database schemas**, **role-based access control**, and **resilient backend architectures**. Seeking a Technology internship at **GEP Worldwide** to contribute to enterprise software solutions and deliver meaningful business impact.

EDUCATION

Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat	2024 – Present
B.Tech in Artificial Intelligence CGPA: 8.41 / 10.0	
Burhani English Medium School Class XII (CBSE) 84.30%	2024
St. Mary's School Class X (CBSE) 95.33%	2022

RELEVANT COURSEWORK

Operating Systems	Database Management Systems	Data Structures & Algorithms
Object-Oriented Programming	Computer Networks	

PROJECTS

AtomQuest – Enterprise-Grade Goal Tracking & Performance Management Portal [Live Demo](#) | *React 19, Supabase, PostgreSQL, TanStack Router, Recharts, Vercel*

- Architected a **role-based goal management system** supporting a full **OKR/KPI lifecycle state machine** (Draft → Submitted → Approved → Quarterly Check-ins) with **RBAC** across 3 user roles enforced at the database layer via **Supabase Row Level Security (RLS)** — demonstrating applied knowledge of **access control**, **data isolation**, and **secure system design**.
- Designed a **normalised 6-table PostgreSQL schema** (profiles, goal_sheets, goals, achievements, checkins, audit_logs) with **FK constraints**, **unique indexes**, and an **immutable JSONB audit trail** capturing before/after snapshots of all post-lock mutations — mirroring governance requirements in enterprise software.
- Built a **client-side deterministic scoring engine** computing weighted KPI aggregates across 4 UoM types with **O(n)** time complexity; integrated **Recharts** dashboard, CSV export, and shared KPI broadcast — deployed via automated **CI/CD** on Vercel.

Rabuste – Full-Stack Cafe Experience Platform [Live Demo](#) | *React 18, Node.js, Express 5, MongoDB, Gemini API, Firebase, Razorpay, Cloudinary*

- Built a **production-grade MERN platform** integrating **5 core subsystems** — menu ordering, art gallery, workshop booking, AI barista chat, and admin analytics — with **Razorpay** payment flows (signature verification) across all 3 purchase types (menu, art, workshop) and **Nodemailer** transactional email automation.
- Implemented **dual-layer authentication** using **Firebase Auth** (Google OAuth + email) with server-side **Firebase Admin** token verification and **JWT** backward compatibility; secured **20+ REST API routes** across auth, menu, gallery, workshops, payments, and analytics with role-based middleware.

Flexora – Full-Stack E-Commerce System with Recommendation Engine [Live Demo](#) | *React.js, Django, PostgreSQL, REST API, Razorpay, Railway*

- Designed a **Django REST Framework** backend with **PostgreSQL**, **React.js** frontend, and end-to-end **Razorpay** payment integration — a **resilient, scalable** system handling the complete e-commerce flow from catalog to checkout.
- Implemented a **preference-based recommendation engine** using user preference scoring and swipe-based feedback signals, increasing simulated engagement by **3×**; deployed via **CI/CD** on Railway reducing deployment time by **40%**.

TECHNICAL SKILLS

Languages:	C, C++, Python, JavaScript (ES6+)
Core CS:	DSA, OOP, DBMS, OS, Computer Networks
Backend:	Node.js, Express.js, Django, FastAPI, REST API Design
Databases:	PostgreSQL, MySQL, MongoDB, Schema Design, Row Level Security (RLS), Audit Logging
DevOps/Cloud:	Docker, Git, GitHub, Vercel, CI/CD

ACHIEVEMENTS & CERTIFICATIONS

- AtomQuest Hackathon 1.0** – Delivered an enterprise-grade portal with normalised PostgreSQL schema, RBAC, RLS enforcement, immutable audit logging, and a deterministic scoring engine within competition timeline.
- Google Winter of Code (GWOC)** – Competitively selected institute-wide to build and deploy a client-facing production system under GDGC NIT Surat mentorship.
- Web Wonders Hackathon** – Awarded for innovation and design excellence with Flexora among 100+ participants.
