## SUMMARY

Artificial Intelligence student with hands-on experience in AI, Machine Learning, and Full-Stack Development. Experienced in developing scalable, user-focused applications using React.js, Next.js, Node.js, Express.js, MongoDB, MySQL, Python, and SQL, driven by strong problem-solving and continuous learning.

---

## PROJECTS

### Flexora – Fashion E-Commerce Web Application

Live: <https://flexora-fdhsmvc0t-sakinas-projects-00bf43f6.vercel.app>

- Developed Flexora, a modern fashion e-commerce web application featuring product browsing, collections, and category-based navigation
- Designed a responsive and visually appealing UI using React.js, Next.js, and Tailwind CSS to enhance user experience across devices
- Implemented features such as product listings, trending collections, spotlight sections, and interactive quiz functionality

### CompareX – Web Application

- Developed CompareX, a web platform for searching and comparing product prices across multiple online sources.
- Built automated web scraping pipelines to collect product details and pricing data, ensuring accurate and up-to-date information.
- Designed an admin dashboard with cron-based automation and worker processes for efficient product management and scheduled data updates.

### Smart Resume Screening System

- Built an AI-powered Resume Screening System that analyzes resumes against job descriptions using Google Gemini 3.5 Flash, providing automated candidate evaluation and match scoring.
- Developed a full-stack recruiter dashboard with resume upload, candidate leaderboard, radar-based skill analysis, keyword matching, and side-by-side candidate comparison for faster hiring decisions.
- Integrated Generative AI to generate personalized interview questions, highlight candidate strengths and weaknesses, and provide structured hiring insights through an interactive web application

---

## EDUCATION

### Bachelor of Technology (B.Tech) – Artificial Intelligence

Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat

**Relevant Coursework:** Machine Learning, Data Structures, Design and Analysis of Algorithms, Linear Algebra, Probability and Statistics, Operating Systems, Computer Networks, Database Management Systems, Theory of Computation.

---

## TECHNICAL SKILLS

- |                                                                        |                                                |
|------------------------------------------------------------------------|------------------------------------------------|
| • Programming Languages: JavaScript, Python, SQL, HTML, CSS            | • Backend: Node.js, Express.js, Django         |
| • Frontend: React.js, Next.js, Tailwind CSS, Responsive UI Development | • Databases: MongoDB, MySQL                    |
| • Tools & Technologies: Git, GitHub, VS Code, REST APIs, Postman       | • Core Concepts: Web Scraping, API Integration |

---

## ACHIEVEMENTS & PARTICIPATION

- |                                                                       |          |
|-----------------------------------------------------------------------|----------|
| • Women Who Master Hackathon – Logitech & Aspire For Her              | Jul 2026 |
| • Generative AI 101 – Build the AI Edge for 2026 (GUVI & HCL Webinar) | Oct 2025 |
| • Web3 & Rust Foundations – Xcan                                      | Aug 2026 |
| • Management Co-Head – Mindbend                                       |          |
-
