Education

Sardar Vallabhbhai National Institute of Technology (SVNIT) — Surat, India

2024 – Present

Bachelor of Technology in Artificial Intelligence | Roll No.: U24AI118

Cumulative CGPA: 7.86/ 10.0

Technical Skills

- **Languages:** Python, C++, JavaScript, TypeScript, SQL
- **Frameworks & Libraries:** FastAPI, React, Next.js, LangChain, Prisma, Tailwind CSS
- **AI / ML:** LLMs, RAG, Agentic & Multi-Agent Systems, Vector Search
- **Tools & Databases:** PostgreSQL, ChromaDB, Redis, Docker, Git, JWT, Vercel

Relevant Coursework

- **Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, Design & Analysis of Algorithms, Artificial Intelligence, Operating Systems, Database Management Systems, Computer Networks, Automata & Formal Languages, Computer Organization
- **Mathematics:** Linear Algebra, Probability & Statistics, Discrete Mathematics, Differential Equations

Projects

Legality AI — AI-Powered Legal Risk Detector

Dec 2025 – Jan 2026

Python, FastAPI, LangChain, React/TypeScript, ChromaDB, Groq (Llama-3.3-70b) | [GitHub](#)

- Architected a **3-agent adversarial debate loop** (Pessimist → Optimist → Arbiter) for clause-by-clause contract analysis, eliminating false positives while preserving full decision transparency.
- Built a **multi-stage RAG pipeline** over **640 verified clauses** (CUAD dataset) with hybrid PDF extraction (PyMuPDF + PDFPlumber + Tesseract OCR) and 3-zone confidence scoring.
- Shipped a React/TypeScript dashboard surfacing **compound cross-clause risks** and auto-suggesting safer contract language.

Agentic Honey-Pot — Autonomous AI Scam Defense System

Jan 2026 – Feb 2026

Python, FastAPI, Groq / Gemini, ChromaDB, sentence-transformers, Docker | [GitHub](#)

- Engineered a **three-phase agentic pipeline** (Detection → Engagement → Extraction) that autonomously baits scammers and sustains a convincing persona in real time.
- Built a RAG-augmented detection engine across **15+ Indian scam categories**, combining vector search with LLM zero-shot classification.
- Parallelized engagement and extraction via `asyncio` with multi-provider LLM fallback (Groq → Gemini → OpenRouter), achieving **99%+ uptime** on a deployed Hugging Face Spaces instance.

TransitOps — Smart Transport Operations Platform

Hackathon Build

Next.js, TypeScript, PostgreSQL, Prisma, Tailwind CSS, JWT | [GitHub](#) | [Live Demo](#)

- Designed a **4-tier RBAC system** (Fleet Manager, Driver, Safety Officer, Financial Analyst), each with distinct permissions and dashboard views.
- Implemented a **cross-entity rules engine** enforcing license/status validation, cargo-capacity checks, and atomic vehicle-driver state transitions across the trip lifecycle.
- Built a reporting layer computing Fleet Utilization, Fuel Efficiency, and a **custom ROI formula**, backed by a live deployed demo.

Achievements

Top 850 Finalist — India AI Impact Buildathon 2026

Feb 2026

GUVI HCL / India AI Impact Summit, Bharat Mandapam, New Delhi — selected from **38,000+ participants** nationwide

[Certificate](#)

Finalist — Genesis 2025 (ACM × CEV × GDGC, NIT Surat)

Dec 2025

Recognized for innovation and problem-solving in building **Legality AI**

Extracurricular Activities

Research & Development Executive — Mindbend 2025, NIT Surat's Annual Technical Fest

Jan – Mar 2025

- Served on the R&D core committee — designed and evaluated problem statements, and coordinated judging for the festival's flagship competitions.

Member — Nexus, CSE & AI Departmental Cell, SVNIT Surat

2024 – Present

- Active contributor to SVNIT's CSE & AI community through coding-culture events and department tech initiatives.
