SUMMARY

I am an undergraduate student in Artificial Intelligence at Sardar Vallabhbhai National Institute of Technology (SVNIT) with a strong background in full-stack web development using the MERN stack (MongoDB, Express.js, React.js, Node.js). I have experience in designing and deploying scalable web applications that feature RESTful APIs, JWT authentication, MongoDB transactions, payment workflows, and responsive user interfaces. I am passionate about developing secure, scalable software solutions and solving real-world engineering problems through modern web technologies

EDUCATION

- Sardar Vallabhbhai National Institute of Technology (SVNIT)** *Surat, India*
Bachelor of Technology in Artificial Intelligence; **CGPA: 7.04** 2024 – 2028
- JEE Main:** Secured **98.9 Percentile** among 14 Lakh candidates.
- Relevant Coursework:** Machine Learning, Data Structures & Algorithms, Python for AI, DBMS, Computer Organization.

EXPERIENCE

- AI Evaluator (RLHF)** *Remote*
Outlier 2025 – Present
 - Evaluated and refined large language models through Reinforcement Learning from Human Feedback (RLHF) methodologies to improve response quality, safety, and alignment.
 - Contributed to specialized AI training projects including **Whitebeard** and **Mechanic Glen V2**, maintaining high accuracy in complex data labeling tasks.
 - Assessed model outputs for logical coherence, coding accuracy, factual correctness, and adherence to strict project-specific guidelines.

SKILLS

Languages: C, C++, Python, JavaScript (ES6+), HTML5, CSS3
Frameworks: React.js, Node.js, Express.js, Tailwind CSS, Bootstrap
Databases: MongoDB, Firebase Firestore, SQLite, MySQL
AI/Tools: Scikit-learn, Git, GitHub, Postman, REST APIs, Vercel

PROJECTS

- MindSettler - Mental Health Platform** | *MERN Stack, Nodemailer, Vercel* [🔗 mindsettler-taupe.vercel.app](https://mindsettler-taupe.vercel.app)
 - Developed a full-stack mental health platform using the MERN stack that enables secure therapist session booking and wallet-based payments.
 - Designed RESTful APIs with JWT authentication and role-based authorization to securely manage users, therapists, appointments, and wallet transactions.
 - Integrated Nodemailer to automate email notifications for account activities, bookings, wallet updates, and appointment confirmations.
- URL Shortener Platform** | *MERN Stack, JWT, Axios, Vercel* [🔗 shortify.vercel.app](https://shortify.vercel.app)
 - Developed a full-stack URL shortening platform with secure user authentication, custom short URLs, URL management, and click analytics using the MERN stack.
 - Designed scalable RESTful APIs following a layered architecture (Routes, Controllers, Services, DAO) to improve maintainability, modularity, and code reusability.
 - Implemented production-ready backend features including centralized error handling, environment-based configuration, input validation, and secure deployment practices.

ACHIEVEMENTS & CERTIFICATIONS

- Genesis Hackathon:** Ranked among the **Top 5 teams** in collaboration with ACM and CEV SVNIT.
- Gridlock Hackathon 2.0:** Participated in the national-level event organized by **Flipkart**.
- Google Winter of Code (GWOC):** Awarded **Winner** for the MindSettler project.
- Web Wonders Competition:** Recognized as **Finalist** in the national-level web development competition at NIT Surat.
- LeetCode:** Solved **100+** **algorithmic problems** demonstrating strong data structure proficiency.
- GeeksforGeeks:** Solved **50+** **algorithmic problems** focusing on competitive programming.

POSITIONS OF RESPONSIBILITY

- Sparsh, SVNIT** *Surat, India*
Co-Head, Infrastructure Team Oct 2025 – Present
