EDUCATION

2024 - 2028

SARDAR VALLABHBHAI NATIONAL INSTITUTE OF TECHNOLOGY, SURAT

Bachelor of Technology in
Computer Science | 2024 -
2028

- Current CGPA: 8.37

2012 - 2024

ST. JOSEPH'S SCHOOL, ABU DHABI

CBSE 10th & 12th

- Grade 12: 95.2%
- Grade 10: 97.6%

SKILLS

- Programming: Python, C, C++, OOPs, HTML, CSS, JavaScript (basic exposure)
- Database: MySQL
- Algorithms & Problem Solving: DSA
- Design Tools: Canva
- Soft Skills: Fast learner, Logical thinker, Analytical skills
- GIT Hub basics

SUMMARY

Third-year B.Tech Computer Science student at SVNIT, Surat (Batch 2024-2028) with a solid foundation in Data Structures & Algorithms, programming, and database systems. Proficient in Python and object-oriented programming, with working knowledge of MySQL, HTML, CSS, and basic JavaScript. Currently strengthening problem-solving skills through C++ and consistent DSA practice, while seeking opportunities to apply my skills, learn from experienced engineers, and contribute to real-world software development.

EXPERIENCE

Google StudyJams 2025

- Participated in structured learning sessions focused on building foundational skills in Google technologies and practical problem-solving through guided modules and hands-on exercises.

Participant — Finnovate — IIT Gandhinagar

- Role: Frontend Developer · Tech: React, TypeScript, Azure OCR
- Worked on a system to extract structured information from invoices using OCR, covering handwritten, printed, digital, and UPI receipts. Built the React + TypeScript frontend interface for uploading invoices and displaying extracted details. Collaborated with the team to integrate Azure OCR and ML outputs. Shortlisted among 20 teams across two problem statements.

Participant — Smart India Hackathon 2025

- Shortlisted for SIH Round 1; collaborating with a team to develop a solution to a real-world problem statement.
- Enhancing skills in teamwork, rapid prototyping, and technical problem solving.

Participant — Reva — Fashion Website

- Fashion Website — HTML, CSS, Tailwind CSS, JavaScript, Firebase
- Collaborated with a team to develop a college student-focused fashion website emphasizing sustainable and affordable fashion.
- Integrated a mini-game tailored for college students to enhance engagement and interactivity.

FurEver Home — Pet Adoption Platform (Frontend Prototype)

- Developed a responsive website prototype for pet adoption using HTML, CSS, and basic JavaScript.
- Designed interactive UI components (navigation, CTAs, booking prompts) and optimized layout with visuals/icons.
- Learned frontend deployment on Netlify and best practices for responsive design.

Sustainability Awareness Platform (Python/Tkinter)

- Built an interactive Python application promoting sustainability and SDG awareness.
- Features included image-based navigation, SDG goal buttons with descriptions, embedded video, feedback management connected to MySQL, and functional sign-up/sign-in with authentication.
- Gained experience with GUI development, database integration, multimedia content, and UX design.
