EDUCATION

Sardar Vallabhbhai National Institute of Technology (SVNIT)

B.Tech in Computer Science and Engineering, Class of 2028

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks, Theory of Computation

Surat, India

CGPA: 7.43/10

EXPERIENCE

Software Engineering Intern (Incoming)

Deloitte

Dec 2026 – Jan 2027

Manama, Bahrain

DRDO CABS – Software Engineering Intern, ML Systems

Centre for Air Borne Systems, DRDO

May 2026 – Present

Bangalore, India

- Engineered a **scalable data processing pipeline** across a **12,000+** image maritime dataset, improving downstream model accuracy from **47.0% to 71.2% (+51% relative improvement)**.
- Built **automated data ingestion and synthesis tooling** to curate a **12,000+** image dataset across EO and SAR imagery, generating **5,000+ physics-based synthetic images** modeling Kelvin wakes, ocean clutter, and speckle noise.
- Collaborated with a **cross-functional engineering team** to design filtering, deduplication, and annotation workflows, cutting manual processing effort by **70%+** through software automation.

PROJECTS

TerraShield | Next.js, FastAPI, PostgreSQL, Pydantic (Canara Bank E Suraksha 2.0 Hackathon – 2nd Place)

Jun 2026 – Jul 2026

- Architected a full-stack **mortgage fraud-detection platform** using **Next.js** and **FastAPI**, reducing underwriting turnaround from **3–5 days to under 60 seconds**, a **99.9%+ reduction**.
- Engineered a **strongly typed, asynchronous 5-stage pipeline** with **Pydantic v2** and **10 REST API endpoints**, automating OCR, document forensics, land-record validation, financial analysis, and risk scoring.
- Built a **privacy-first AI engine** using **Tesseract**, **OpenCV**, **spaCy**, and **Qwen2.5 3B** to analyze **12 loan-document types** while eliminating **100% of paid cloud-AI API calls**.

Genesis – Real-Time Trading Analytics Platform | Python, FastAPI, Streamlit, Plotly (1st Place – Genesis Hackathon)

Dec 2025 – Feb 2026

- Secured **1st place at Genesis** by developing MarketGenesis, a full-stack Indian-equity analytics platform with **5 serverless APIs**, **16 React components**, and **5 integrated trading modules** using **Next.js**, **TypeScript**, **PostgreSQL**, and **Firebase**.
- Engineered **16 quantitative indicators and market-structure algorithms** across two years of OHLCV data, powering three forecasting strategies, an **80/20 backtesting pipeline**, 5-day predictions, and six performance metrics.
- Reduced market-news analysis time by **99%**, from approximately **20 minutes to under 10 seconds**, by automating aggregation of 16 articles from two financial feeds and **Gemini-powered sentiment analysis**.

Basho – E-Commerce Platform | Django, React, PostgreSQL, SQLite

Jan 2026

- Architected a full-stack, **scalable marketplace** for handcrafted ceramics and workshops using **Django REST Framework** and **React**, with **JWT-based authentication** and **role-based access control**.
- Designed and shipped **RESTful APIs** for payment processing using Razorpay, order verification, and workshop registration featuring **real-time slot availability** logic.
- Designed a **normalized, production-ready PostgreSQL schema** with optimized query performance and configured **SQLite** for local development parity.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, TypeScript, SQL

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Distributed Systems Concepts

Full-Stack & Backend: Node.js, Express.js, FastAPI, Next.js, React, REST APIs, Microservices

Tools and Databases: Docker, Git, Linux, MongoDB, PostgreSQL, Postman, CI/CD

Data Analysis: NumPy, Pandas, Plotly, Statistical Analysis, Data Visualization

Generative AI: LLM APIs, RAG Pipelines, Vector DBs

ACHIEVEMENTS

- Canara Bank E Suraksha 2.0 Hackathon – 2nd Place:** Secured **2nd place** among **5,500+ participating teams** nationwide with TerraShield, an AI-powered property-loan fraud detection platform.
- Amazon ML Summer School 2026:** Selected through a competitive nationwide application process to participate in Amazon's intensive machine learning curriculum.
- Genesis Hackathon – 1st Place** (GDGC x ACM x CEV, SVNIT): Ranked **1st** among all participating teams for an intelligent market microstructure pattern discovery system.
