Education

Sardar Vallabhbhai National Institute of Technology, Surat

2024 – 2028

Bachelor of Technology (B.Tech.) in Computer Science and Engineering

CGPA: 8.31

Indian School Al Wadi Al Kabir

2024

CBSE Class XII

95.6%

Indian School Al Wadi Al Kabir

2024

CBSE Class X

95.6%

Technical Skills

Languages: C++, Python, Java, JavaScript, TypeScript, C, SQL, HTML/CSS

Frameworks: React, Next.js, Express.js, FastAPI, Tailwind CSS

Libraries: SWR, Pandas, NumPy

Databases: MongoDB, MySQL, Supabase

Developer Tools: Git, GitHub, VS Code, Postman

Projects

Autonomous Drone Dispatch & Fleet Coordination System | Python, FastAPI, MongoDB Inspiron 5.0

- Engineered the backend dispatch engine supporting mission assignment, fleet state management, recall logic, no-fly-zone avoidance, and real-time telemetry.
- Designed scheduling logic for battery-aware multi-drone coordination across simultaneous incidents.
- Validated the system using a 100-incident load test, achieving 75.67 ms average dispatch latency and approximately 1321 incidents/sec throughput.
- Winner of Inspiron 5.0 organized by the Computer Society of India (CSI) and COEP Technological University Student Chapter.

PRISM 2026 – Official Sports Fest Platform | Next.js, React, TypeScript, Express.js, MongoDB 2026

- Developed the official sports management platform for SVNIT's annual sports fest with live scores, leaderboards and fixtures.
- Built a centralized admin dashboard for publishing match results and standings across multiple sports.
- Optimized data fetching using SWR caching to reduce redundant API requests and improve responsiveness.
- Designed a scalable architecture with reusable components supporting future expansion.

Invoice Analysis | Python, Azure OCR, Tesseract, React, MongoDB

- Developed an automated invoice extraction system for PDF invoices using OCR and machine learning techniques.
- Achieved 90% text extraction accuracy and 70% handwritten invoice recognition accuracy.
- Reduced processing time by nearly 80% through batch processing and automated workflows.
- Integrated MongoDB for persistent storage and seamless downstream system integration.

Positions of Responsibility

Nexus Technical Club

DSA Mentor

- Mentored first-year students through structured Data Structures and Algorithms sessions.
- Guided juniors in problem solving, debugging techniques and coding best practices.

Achievements

- Winner – Inspiron 5.0 Hackathon for the Autonomous Drone Dispatch & Fleet Coordination System.
- Developed the official PRISM 2026 Sports Fest website for SVNIT.
- Successfully completed the official Google Cloud Study Jams program.
- Won Best Delegate award at Mindbend Model United Nations 2026.

Relevant Coursework

- Data Structures & Algorithms
- Object-Oriented Programming
- Database Management Systems
- Computer Organization
- Computer Networks
- Artificial Intelligence
