EDUCATION

Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat 2023 – 2027

B.Tech, Computer Science & Engineering | CGPA: 8.02 / 10

PROJECTS

Algorithmic Trading Bot Python · XGBoost · LightGBM · yfinance · TA-Lib

ML-powered intraday trading system for Bank NIFTY / NIFTY indices

- Built a hybrid rule-based + ML ensemble (XGBoost 55% / LightGBM 45%) fusing RSI mean-reversion, EMA/VWAP alignment, and momentum signals into a weighted decision engine with walk-forward friendly architecture.
- Achieved **15.1% annual return** on 1-year backtest with **Sharpe ratio 3.51** and max drawdown -2.63%; paper trading yielded +₹344 P&L with 62.1% win rate across 29 live trades.
- Iterated through Random Forest and LSTM before choosing gradient boosting — LSTM overfit 1-min microstructure noise, validating the final ensemble architecture.

Rabuste Café — Full-Stack Web Platform React · Node.js · MongoDB · Firebase · Three.js

Digital ecosystem for a Surat-based premium Robusta coffee brand

- Built full-stack platform featuring AI menu recommendations, a Synesthesia Pairing Engine (coffee × art via cosine similarity), and a 3D virtual café experience using Three.js / WebGL.
- Implemented RBAC admin panel, Razorpay payment gateway, Firebase Auth, Google Places API (live reviews), and Google Gemini API as a conversational digital barista — all in a single unified commerce flow.

Emergency Truth Engine — Hackathon (Finalist, Dotslash 2026) Next.js · Supabase · Twilio · PWA · ML

Offline-first emergency reporting system for low-connectivity / rural regions

- Built offline-first PWA using IndexedDB (Dexie) storing reports locally and auto-syncing via Twilio-powered 112 calls + government dashboard on any connectivity (even 2G).
- Deployed multi-model AI verification pipeline: Xception (deepfake detection, 95%+), RoBERTa (text authenticity, 98%+), CLIP (image-text consistency, 88%+) for CRITICAL / HIGH / MEDIUM / LOW prioritization.

rPatel E-Commerce Platform — Freelance React · Node.js · MongoDB · Express.js

Full-stack e-commerce solution delivered independently for an Australian client

- Sole developer: handled client requirements, architecture, development, and deployment end-to-end — demonstrates ability to ship production-grade code with real commercial accountability.

RESEARCH & PUBLICATIONS

SemEval-2026 Task 2: Hierarchical Time-Aware Modeling for Longitudinal Affect 2026

Proceedings of the 20th International Workshop on Semantic Evaluation (SemEval-2026)

- Proposed a hierarchical deep learning system: DeBERTa-v3 encoder (CCC loss, valence CCC 0.747) for affect assessment + Bi-LSTM (sliding window k=5) for longitudinal forecasting + Ridge Regression for personality profiling.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, TypeScript

Frameworks & Tools: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Three.js, Framer Motion

ML / AI: scikit-learn, XGBoost, LightGBM, PyTorch, HuggingFace Transformers, TensorFlow

Databases & Cloud: MongoDB, PostgreSQL, Firebase, Supabase

Integrations: Razorpay, Twilio, Google Gemini API, REST APIs, Git

ACHIEVEMENTS & AWARDS

- 1st Prize — GWOC SVNIT** · Inter-college technical competition, SVNIT Surat
- 1st Prize — Genesis 2026** · Hackathon / technical event
- Finalist — Dotslash 2026** · Competitive national-level hackathon (Emergency Truth Engine)
- 300+ LeetCode problems** · Arrays, trees, graphs, DP — consistent algorithmic practice
