EDUCATION

Bachelor of Technology in Computer Science Sardar Vallabhbhai National Institute of Technology, Surat CGPA - 8.83	08/2024 – Present Surat
Higher Secondary Education Cosmos Castle International School 91%	06/2022 – 03/2024 Ahmedabad
Secondary Education Amrita Vidyalayam 95%	04/2009 – 05/2022 Ahmedabad

TECHNICAL SKILLS

Languages C++ , C, JavaScript, Python	Frameworks React , Node.js, Express.js, Next.js
Web & Backend REST APIs, Authentication, RBAC, WebSockets, PWA, Service Workers	Developer Tools VS Code, Postman, Git, GitHub
Databases MySQL, MongoDB	Core CS Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks

COMPETITIVE PROGRAMMING

LeetCode 🏆 — Contest Rating - 1772, Solved over 600+ problems | **CodeForces** 🏆 — Contest Rating - 1444(Max:1457)

PROFESSIONAL EXPERIENCE

Full Stack Developer Woodonga Wholesale, Australia 🏆	05/2026 – 07/2026
- Co-developed a scalable B2B/B2C e-commerce platform using Next.js, TypeScript, FastAPI, and PostgreSQL, supporting dynamic product catalogs, wholesale pricing, customer reviews, and inventory driven shopping experiences. - Engineered a modular backend architecture with FastAPI, Pydantic, and SQLAlchemy, exposing secure REST APIs and complex relational data models for products, categories, image galleries, and customer interactions. - Ensured production reliability through comprehensive integration testing, schema migrations, and API contract validation, enabling seamless frontend-backend synchronization and maintainable future development.	

PROJECTS

Essential Emergency Truth Engine
- Built offline first PWA with Next.js, Dexie.js IndexedDB, and Service Workers for zero connectivity emergency reporting with automatic cloud sync via Supabase PostgreSQL. - Integrated geolocation tracking using Leaflet.js and GPS APIs with offline map caching; enabled automatic data transmission on reconnection for persistent emergency records. - Implemented AI powered incident analysis with Google Gemini API, Tesseract.js OCR for evidence extraction, and multi modal data processing from text, images, and audio. - Deployed WhatsApp Business API integration for emergency notifications to government agencies with Cloudinary CDN for media storage and Chart.js for real time analytics dashboards.

- Architected Next.js API routes connected to Supabase with Row-Level Security (RLS) policies, ensuring secure government level data isolation and role-based access control.

Rabuste Café, Surat

AI Powered Robusta Coffee & Immersive Community Platform

- Built a full stack digital ecosystem for a Robusta only premium coffee brand, blending ecommerce, art marketplace, workshops, and immersive 3D experiences into one scalable platform.
- Engineered AI driven personalization including menu recommendations, a Synesthesia Coffee × Art Pairing Engine, and a Gemini powered digital barista chatbot for intelligent user engagement.
- Developed an interactive Virtual Café using Three.js/WebGL with animated navigation, creating a digital twin that connects brand storytelling with seamless commerce.
- Implemented secure role based admin architecture with explainable, human controlled AI tags, protected routes, Razorpay payments, Firebase authentication, and MongoDB powered data management.
- Designed a scalable MERN stack application (React, Tailwind, Framer Motion, Node.js, Express, MongoDB) with real-time personalization, workshop bookings, art commerce integration, and analytics tracking.

POSITION OF RESPONSIBILITY

Problem Setter | ACM, NIT SURAT

- Designed and validated competitive programming problems for coding contests, creating comprehensive test cases and ensuring correctness, edge case coverage, and appropriate difficulty calibration.
- Collaborated with the contest team to review solutions and maintain high quality problem statements for student programming events.

DSA Mentor | NEXUS, NIT Surat

- Mentored junior students in Data Structures and Algorithms through doubt solving sessions, problem discussions, and coding guidance.
- Assisted students in strengthening problem solving skills across topics such as arrays, graphs, dynamic programming, and competitive programming fundamentals.

ACHIEVEMENTS

Secured 1st rank in Google Winter of Code 2026

GDGC-NIT Surat

Secured 1st Rank in Genesis

CEV-NIT Surat

Secured AIR 6805 in IIT-JEE 2024

IIT MADRAS

Secured AIR 4797 in JEE MAIN 2024

JOSAA

Qualified for Regional Mathematical Olympiad (RMO), Gujarat Region(Category A)

MTA(I)
