EDUCATION

B.Tech

Sardar Vallabhbhai National Institute of Technology
3rd Year, Computer Science and Engineering

SKILLS

- Efficient knowledge about HTML, CSS, JavaScript
- Programming in Object Oriented Language C++ and Python
- Competitive Programming Using DSA
- Frontend development using react-js.
- DBMS in Mysql and oracle
- Basic knowledge about Hardware Circuit Design.

PROJECTS

Servito

Project on basis Object Oriented Language

-> Developed a responsive and user-friendly frontend for **Servito**, a platform that connects users with local service professionals and technicians based on their requirements.

-> Designed and implemented reusable React.js components to create an intuitive interface for browsing and booking local services.

-> Collaborated with team members to improve UI/UX, optimize application performance, and deliver a clean, modern interface.

Joy Juncture

Project allocated during winter break (Google Winter Of Code)

-> Led a team of developers in planning, coordinating, and delivering the frontend of **Joy Juncture**, ensuring timely completion of project milestones.

-> Designed and developed the complete frontend interface for an event/workshop management platform with an integrated game store using React.js.

-> Optimized the application's structure and navigation to provide a smooth, engaging, and user-friendly experience across the platform.

LANGUAGES

English

Hindi
