

EDUCATION

Degree	Institute / Board	CGPA / Percentage
B.Tech. (CSE)	Sardar Vallabhbhai National Institute of Technology, Surat	8.34/10
Senior Secondary (CBSE)	Swami Vivekanand Govt. Model School, Gangapur City	94.8%
Secondary (RBSE)	Mittal Adarsh Sr. Sec. School, Gangapur City	98.0%

TECHNICAL PROJECTS

•Video Conferencing Platform

- React.js / Node.js / Express.js / Socket.io / WebRTC
- Developed a real-time video conferencing platform enabling secure meeting creation and peer-to-peer audio/video communication using **WebRTC**.
 - Implemented signaling, live messaging, and media streaming using **Socket.io** and **Node.js**, ensuring reliable real-time communication.
 - Optimized client-server communication to reduce latency and improve connection stability across concurrent video sessions.
 - Designed a modular frontend-backend architecture with REST APIs, improving scalability and maintainability.

•ResolveAI – AI Customer Support Platform

- React.js / Node.js / Express.js / MongoDB / Gemini API
- Developed a scalable customer support platform integrating Google’s **Gemini API** for intelligent, context-aware assistance.
 - Engineered backend workflows for automated ticket generation, issue classification, department routing, priority prediction, and sentiment analysis.
 - Built RESTful APIs using **Express.js** and **MongoDB** for efficient ticket and conversation management.
 - Designed a modular architecture separating frontend, backend, and AI services, improving maintainability and future scalability.

•Driver Drowsiness Detection System

- Python / TensorFlow / MobileNetV2 / OpenCV / Computer Vision
- Developed a real-time driver drowsiness detection system using **MobileNetV2** and computer vision techniques for fatigue monitoring.
 - Built a custom dataset by recording videos for multiple driver states, extracting video frames, and manually organizing them into five labeled classes: **Alert, Drowsy, Awake, Head Tilt, and Yawn**.
 - Trained and evaluated the model on approximately **4,500+ labeled images**, improving robustness for real-time classification across multiple driver behaviors.
 - Integrated the trained model with OpenCV to perform live webcam-based inference and generate alerts upon detecting drowsiness.

TECHNICAL SKILLS

- **Programming Languages:** C++, Java, Python, JavaScript
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Material UI
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** MongoDB, Firebase
- **Tools & Technologies:** Git, GitHub, Postman, VS Code, Socket.io, WebRTC, OpenCV

POSITIONS OF RESPONSIBILITY

- | | |
|---|----------------|
| • Representative ,Nexus – Departmental Cell of Computer Science & AI | 2025 – Present |
| • Magazine Secretary ,Mother Teresa Bhavan Hostel Management Committee | 2025 – Present |
| • Co-Head, Hospitality & Discipline ,Sparsh’26 | 2026 |

CERTIFICATIONS

- **AWS Educate** – Introduction to Generative AI
- **HP LIFE** – AI for beginners
