Education

Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat 2024 – Present
B.Tech in Computer Science and Engineering **CGPA: 9.13 / 10**

Skills

Programming Languages: C++, Python, JavaScript, C, SQL
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST APIs
Databases & Cloud: MongoDB, Firebase
Machine Learning/NLP: PyTorch, Hugging Face Transformers, DeBERTa-v3, RoBERTa, FLAN-T5
Developer Tools: Git, GitHub, VS Code
Core CS: Data Structures and Algorithms, Database Management Systems, Object Oriented Programming, Operating Systems, Computer Networks

Research Experience

SemEval 2026 Task 5: Rating Plausibility of Word Senses in Ambiguous Sentences
NLP Research — Transformer Architectures & Ordinal Learning — **Stack:** PyTorch, Hugging Face, DeBERTa-v3, FLAN-T5, RoBERTa, WordNet, HPC/SLURM

- Research Paper — Under review at SemEval 2026 (Camera-ready in progress)
- Developed and evaluated transformer-based systems for semantic plausibility scoring on the **AmbiStory dataset** (2,280 train / 588 dev / 930 test samples).
- Implemented a **DeBERTa-v3-Large cross-encoder** with attention-weighted pooling and hybrid ordinal regression achieving **Spearman 0.718**.
- Designed a **FLAN-T5 + RoBERTa ensemble** using rank-based fusion achieving **Spearman 0.692**.
- Modeled annotator disagreement using uncertainty-weighted loss and ordinal regression thresholds.
- Conducted 5-fold cross-validation to improve model robustness and evaluated using Spearman, Pearson, MAE and RMSE metrics.
- Reduced training time by approximately 30% using mixed precision training, layer freezing and SLURM-based GPU scheduling.

Projects

Product Price Comparator — GitHub
Tech Stack: Node.js, Express.js, MongoDB, Redis

- Engineered a full-stack application aggregating prices from 3+ e-commerce platforms using automated web scraping.
- Reduced repeated database queries by implementing Redis caching, improving response times by 35
- Implemented JWT authentication and automated email alerts enabling real-time price monitoring.

MindSettler – Mental Wellness Platform — GitHub
Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Firebase, Django

- Created a responsive mental wellness platform supporting 50+ users during testing with booking workflows, wellness resources and dashboards.
- Developed 15+ reusable React components with TypeScript and Framer Motion, improving UI consistency.
- Integrated Django REST APIs for bookings, email verification and payment processing.

NOIRÉ – Fashion E-commerce Platform — GitHub
Tech Stack: React.js, Tailwind CSS, MongoDB, Firebase, ImageKit

- Designed a fully responsive fashion e-commerce interface using React and Tailwind CSS.
- Implemented Firebase authentication and MongoDB integration for secure user management.
- Optimized image delivery using ImageKit, reducing image load times by approximately 40

Achievements

Winner — **Genesis**, SVNIT (Product Price Comparator project).
Finalists — **WebWonders 2025** (Fashion Theme), SVNIT
Selected Participant — Google Winter of Code (GWOC) (MindSettler Track)
Participant — **SemEval 2026 Task 5** (International NLP shared task)

Leadership Experience

Community Head — ACM Student Chapter, SVNIT May 2026 – Present
Co-Head — Mindbend, SVNIT Dec 2025 – Present
Junior Developer — Google Developer Group on Campus (GDGC), SVNIT Aug 2025 – Present
