Education

Sardar Vallabhbhai National Institute of Technology (NIT Surat)

Surat, Gujarat

B.Tech in Computer Science Engineering (Minor in Data Structures & Algorithms) | CGPA: 7.4

2024 – 2028

Experience

Google Winter of Code

Jan. 2024 – Mar. 2024

Full Stack Developer – Basho by Shivangi

Remote

- Built a full-stack e-commerce platform with a complete product catalog, custom order request system, and workshop booking module using Next.js and MongoDB.
- Integrated Razorpay payment gateway, Cloudinary image optimization, and JWT-based authentication to support secure transactions.
- Implemented Incremental Static Regeneration (Next.js ISR) and engineered interactive UI components using Framer Motion and Three.js.

Projects

Hand Gesture Control System | Python, OpenCV, MediaPipe, NumPy, CVZone

Aug. 2024 – Present

- Built a real-time computer vision automation system supporting virtual mouse control, volume and brightness adjustments, and a virtual keyboard with gesture typing.
- Processed 60 FPS webcam feeds with an optimized rendering pipeline, utilizing dead-zone filtering and robust fail-safe gesture locking mechanisms.

Cricket-ki-Kundli (IPL Predictor) | Python, Pandas, Scikit-learn, XGBoost, Streamlit

Jan. 2023 – Apr. 2023

- Processed 17M+ ball-by-ball records and engineered 15+ predictive features to build a win probability classifier achieving over 85% accuracy.
- Created a live prediction Streamlit web interface featuring a projected score regression model and leakage-free train/test splits.

ProtoVolt-Lab | React, Three.js, Node.js, Express, MongoDB, C++

Aug. 2023 – Nov. 2023

- Developed a drag-and-drop circuit builder enabling real-time 3D visualization and simulation for electronic design.
- Implemented classroom management workflows and AI-powered circuit suggestions secured via JWT authentication.

Code Execution Engine & Web Sandbox | React, Node.js, Docker

June 2026 – Present

- Architecting a secure, production-grade web sandbox platform and execution engine for safe, isolated code evaluation.
- Engineered a comprehensive frontend dashboard and structured a production-ready environment.

Technical Skills

Languages: Python, TypeScript, JavaScript, C++, HTML/CSS

Frontend: React, Next.js, Tailwind CSS, Framer Motion, Three.js, GSAP, Streamlit

Backend & ML: MongoDB, Node.js, Express, OpenCV, MediaPipe, XGBoost, Scikit-learn, Pandas

Developer Tools: Git, VS Code, Firebase Auth, Razorpay, Cloudinary, JWT
