SVNIT, Surat, India

EDUCATION

Sardar Vallabhbhai National Institute of Technology (SVNIT) <i>B.Tech in Computer Science and Engineering</i>	2024–2028 Surat, India
MES Indian School <i>Senior School Certificate Examination (CBSE) – 94%</i>	2024 Doha, Qatar

EXPERIENCE

Data Science Intern <i>Anvin Infosystem</i>	Jul 2026 Doha, Qatar
---	-------------------------

- Developed an interactive HR Analytics Dashboard using Python, Streamlit, Pandas, and Plotly to visualize employee and workforce data.
- Processed employee data from CSV files and Oracle HCM JSON exports by cleaning, standardizing, and preparing datasets for analysis.
- Performed exploratory data analysis (EDA) and created interactive dashboards to visualize department, designation, gender, country, joining trends, and years of service.
- Implemented employee search and multi-attribute filtering to improve HR data exploration and reporting.
- Integrated the USDA FoodData Central API to retrieve food nutrient data and used Pandas and Postman for data preprocessing, validation, and analysis.

PROJECTS

Bloom Branding Website Winner (Google Winter of Code) bloom-branding-3bdab.web.app	2026
--	------

- Developed a production-ready branding platform by contributing to both frontend and backend development across the full stack.
- Built responsive user interfaces, integrated REST APIs, and collaborated on backend services to deliver a scalable and maintainable web application.
- Won **1st Place** in **Google Winter of Code**; the platform was selected for official adoption by the client for real-world branding and digital operations.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB

PromptShield – Decentralized AI Access Control Protocol	2026
--	------

- Contributed to the development of a decentralized access control application for autonomous AI agents, supporting file-level and time-bound (TTL) security policies on **Arbitrum Sepolia**.
- Developed interfaces for secure AI context access using **AES-256-GCM** encryption, EIP-712 signature verification, and a TypeScript Gatekeeper workflow.
- Developed the interface for a Just-In-Time (JIT) pending request workflow, enabling developers to review access denials and issue on-chain grants without interrupting agent workflows.
- Created the dashboard experience for monitoring real-time **ALLOW/DENY** access decisions, transaction verification, and live WebSocket event streams.
- Designed a modern, responsive web console featuring canvas animations, Framer Motion interactions, modal specifications, and dynamic wallet network switching using Viem/Wagmi.
- **Tech Stack:** React, Next.js, TypeScript, Solidity, Arbitrum, Viem/Wagmi, Tailwind CSS, AES-256

ACTIVITIES

Nexus – Official CSE & AI Cell, SVNIT <i>Nexus Representative</i>	2024–Present
---	--------------

- Mentored 9 students in Data Structures & Algorithms and conducted problem-solving sessions.

ACM & GDG On Campus <i>Executive Member / Developer</i>	2025–Present
---	--------------

- Organized technical events and contributed to development initiatives.

SKILLS

Languages: C++, C, Python, SQL, TypeScript, Solidity

Frameworks: React.js, Next.js, Node.js, Express.js, Streamlit

Databases: MongoDB

Tools: Git, GitHub, Postman, Plotly, Pandas, Cloudinary, Firebase, VS Code, Web3

Core: Data Structures & Algorithms, OOP, DBMS, REST APIs
