

Aditya G. Baldha

Computer Science & Engineering Student — Software Engineering Intern

+91 9152349078 — adityabaldha06@gmail.com — LinkedIn

Professional Summary

Motivated Computer Science and Engineering student with practical experience in Artificial Intelligence, Reinforcement Learning, and Web Development through collaborative academic and open-source projects. Skilled in developing machine learning solutions, contributing to team-based software projects using Git, and applying problem-solving techniques to real-world challenges. Demonstrated leadership by leading a Smart India Hackathon team and successfully qualifying through the college-level screening round. Passionate about building scalable software solutions and eager to contribute as a Software Development or AI/ML Intern.

Technical Skills

Programming Languages: C, C++, Python, JavaScript, SQL

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Machine Learning, Reinforcement Learning

Tools & Technologies: Git, GitHub, VS Code

Projects

AI Image Detector

GitHub

- Collaborated in developing an AI-based image classification system capable of distinguishing AI-generated images from real images.
- Assisted in data preprocessing, model training, evaluation, and performance improvement using modern deep learning techniques.
- Worked within a collaborative GitHub workflow for version control, code integration, and project development.

RL Warehouse Logistics

GitHub

- Contributed to a reinforcement learning project focused on warehouse logistics optimisation and intelligent navigation.
- Participated in implementing and testing learning algorithms to improve operational efficiency within simulated warehouse environments.
- Collaborated with team members using Git-based development practices.

JoyJuncture Website Enhancement

GitHub

- Contributed to feature enhancements and website improvements as part of a collaborative open-source development initiative.
- Worked on improving functionality, user experience, and project maintainability through collaborative development.
- Participated in code reviews, issue discussions, and version-controlled development using GitHub.

Leadership Experience

Team Leader – Smart India Hackathon

- Led a multidisciplinary team during the Smart India Hackathon.
- Coordinated project planning, task allocation, technical discussions, and overall team collaboration.
- Successfully guided the team through the initial college-level screening and qualification round.

Education

Bachelor of Engineering (Computer Science & Engineering)	Current CGPA: 6.84	Pursuing
Higher Secondary Certificate (HSC)	Percentage: 75.8%	Completed
Central Board of Secondary Education (CBSE)	Percentage: 98.2%	Completed

Achievements

- Selected in the initial college screening round of the Smart India Hackathon.
- Contributed to multiple collaborative software development and AI projects using GitHub.
- Gained practical experience in machine learning, reinforcement learning, and modern software development workflows.

Soft Skills

Problem Solving • Leadership • Team Collaboration • Communication • Adaptability • Time Management
